Business case Many projects, but not all, are initiated by using a business case. Institute, a business case is a "value proposition for a proposed project that may include financial and nonfinancial benefit". The logic of the business case is that, whenever resources such as money or effort are consumed, they should be in support of a specific business need. An example could be that a software upgrade might improve system performance, but the "business case" is that better performance would improve customer satisfaction, require less task processing time, or reduce system maintenance costs. A compelling business case adequately captures both the quantifiable and non-quantifiable characteristics of a proposed project. According.
