In the Western world, economics was not a separate discipline, but part of philosophy until the 18th–19th century Industrial Revolution and the 19th century Great Divergence, which accelerated economic growth. 99e6c9b515 E 99e6c9b515 N 99e6c9b515 , 99e6c9b515 P 99e6c9b515 r 99e6c9b515

John Charles Lounsbury Fish John Charles John Charles Lounsbury Fish (June 3, 1870 - June 15, 1962) was a Professor of Civil Engineering, Emeritus, at the School of Engineering, Stanford University. He is known for his works Mathematics of the Paper Location of a Railroad (1905), Earthwork Haul and Overhaul: Including Economic Distribution (1913), Technique of Surveying Instruments and Methods (1917), Engineering Economics: First Principles. (1923), The Engineering Method (1950), Linear Drawing and Lettering for Beginners, Lettering of Working Drawings, and Descriptive Geometry, and also as a coauthor of Technic of Surveying Instruments and Methods (with Walter Loring Webb, 1917), The Transition Curve. (with Charles Lee Crandall), and The Engineering Profession (with Theodore Jesse Hoover, 1941). Electrical engineering Electrical engineering is an engineering discipline concerned with the study, design, and application of equipment, devices, and systems that use electricity Electrical engineering is an engineering

discipline concerned with the study, design, and application of equipment, devices, and systems that use electricity, electronics, and electromagnetism. It emerged as an identifiable occupation in the latter half of the 19th century after the commercialization of the electric telegraph, the telephone, and electrical power generation, distribution, and use 99e6c9b515

Arthur M. Wellington Wellington was involved in the design and construction of new railways in Mexico. He was the editor of the Engineering News. Grant. The saying that An engineer can do for a dollar what any fool can do for two is an abridgement of a statement made in this work (see below). He was born on December Arthur Mellen Wellington (December 20, 1847 – May 17, 1895) was an American civil engineer who wrote the 1877 book The Economic Theory of the Location of Railways. Engineering Economics: First Principles in 1923 and the first publication of the Principles of Engineering Economy in 1930 by Eugene L. He was chief engineer of the Toledo and Canada Southern Railroad 99e6c9b515

This fundamental problem of economics consists of two fundamental questions that must be answered, namely what objectives should be investigated or explored and how should these be achieved? Economics as a social science answers those questions and is defined as the knowledge used for selecting among "...technically feasible alternatives... 99e6c9b515 , 99e6c9b515

Kaoru Ishikawa He is best known outside Japan for the Ishikawa or cause and effect diagram (also known as the fishbone diagram), often used in the analysis of industrial processes. Grant Award 1977 Blue Ribbon Medal by the Japanese Government for achievements Kaoru Ishikawa (石川 寛, Ishikawa Kaoru; July 13, 1915 – April 16, 1989) was a Japanese organizational theorist and a professor in the engineering faculty at the University of Tokyo who was noted for his quality management innovations. He is considered a key figure in the development of quality initiatives in Japan, particularly the quality circle. Wellington in his engineering economics work of the 1870s. , 1931) Eugene Lodewick Grant (February 15, 1897 - July 9, 1996), was an American civil engineer and educator. 39, No. Yntema, Journal of Political Economy, Vol. Reviewed Work(s): Principles of Engineering Economy by Eugene L. 307-313. Grant, Theodore O. He graduated with a BS from the University of Wisconsin in 1917. Grant was the intellectual heir of work performed by John Charles Lounsbury Fish who published Engineering Economics: First Principles in 1923, providing the critical bridge between Grant and the pioneering effort of Arthur M. He started teaching in 1920 at Montana State University and then in 1930 at the School of Engineering, Stanford University where he taught until 1962 99e6c9b515

This field encompasses many disparate schools of economic thought. Ancient Greek writers such as the philosopher Aristotle examined ideas about the art of wealth acquisition, and questioned whether property is best left in private or public hands. In the Middle Ages, Thomas Aquinas argued that it was a moral obligation of businesses to sell goods at a just price.
