Accounting information system The most widely adopted accounting information systems are auditing and financial reporting modules. An accounting information system is generally a computer-based method for tracking accounting activity in conjunction with information technology resources. as no packaged solutions were available. The resulting financial reports can be used internally by management or externally by other interested parties including investors, creditors and tax authorities. Accounting information systems are designed to support all accounting functions and activities including auditing, financial accounting porting, -managerial/ management accounting and tax. Such solutions were expensive to develop and difficult to maintain. Therefore, many accounting practitioners preferred An accounting information system (AIS) is a system of collecting, storing and processing financial and accounting data that are used by decision makers a9cd7ee545

UK Corporate Governance Code It is overseen by the Financial Reporting Council and its importance derives from the Financial Conduct Authority's Listing Rules. It is overseen by the Financial Reporting Council and its importance The UK Corporate Governance code, formerly known as the Combined Code (from here on referred to as "the Code") is a part of UK company law with a set of principles of good corporate governance aimed at companies listed on the London Stock Exchange. The Listing Rules themselves are given statutory authority under the Financial Services and Markets Act 2000 and require that public listed companies disclose how they have complied with the code, and explain where they have not applied the code - in what the code refers to as 'comply or explain'. Private companies are also encouraged to conform; however there is no requirement for disclosure of compliance in private. principles of good corporate governance aimed at companies listed on the London Stock Exchange a9cd7ee545

Corporate governance entrepreneur Corporate transparency - Aspect of open corporate governance Creative accounting - Euphemism referring to unethical accounting practices Earnings Corporate governance refers to the mechanisms, processes, practices, and relations by which corporations are controlled and operated by their boards of directors, managers, shareholders, and stakeholders a9cd7ee545

Since costs and advantages are usually considered in terms of environmental, economic and social impacts, full or true cost efforts are

collectively called the "triple bottom line". Many standards now exist in this area including Ecological Footprint, eco-labels, and the International Council... a9cd7ee545

Carbon accounting Carbon accounting (or greenhouse gas accounting) is a framework of methods to measure and track how much greenhouse gas (GHG) an organization emits. It can also be used to track projects or actions to reduce emissions in sectors such as forestry or renewable energy. It Carbon accounting (or greenhouse gas accounting) is a framework of methods to measure and track how much greenhouse gas (GHG) an organization emits. Organizations will often set an emissions baseline, create targets for reducing emissions, and track progress towards them. Corporations, cities and other groups use these techniques to help limit climate change. The accounting methods enable them to do this in a more consistent and transparent manner a9cd7ee545

Corporate social responsibility Accounting and Reporting (ISAR) provides voluntary technical guidance on eco-efficiency indicators, corporate responsibility reporting, and corporate Corporate social responsibility (CSR) or corporate social impact is a form of international private business self-regulation which aims to contribute to societal goals of a philanthropic, activist, or charitable nature by engaging in, with, or supporting professional service volunteering through pro bono programs, community development, administering monetary grants to non-profit organizations for the public benefit, or to conduct ethically oriented business and investment practices. While CSR could have previously been described as an internal organizational policy or a corporate ethic strategy, similar to what is now known today as environmental, social, and governance (ESG), that time has passed as various companies have pledged to go beyond that or have been mandated or incentivized by a9cd7ee545

Environmental full-cost accounting It is one aspect of true cost accounting (TCA), along with Human capital and Social capital. Environmental full-cost accounting (EFCA) is a method of cost accounting that traces direct costs and allocates indirect costs by collecting and presenting information Environmental full-cost accounting (EFCA) is a method of cost accounting that traces direct costs and allocates indirect costs by collecting and presenting information about the possible environmental costs and benefits or advantages – in short, about the "triple bottom line" – for each proposed alternative. As definitions for "true" and "full" are inherently subjective, experts consider both terms problematic a9cd7ee545

Corporate censorship It is when a spokesperson, employer, or business associate sanctions a speaker's speech by threat of monetary loss, employment loss, or loss of access to the marketplace. Corporate censorship in the E-commerce and technology industry is usually the explicit or implicit Corporate censorship is censorship by corporations. It is present in many different kinds of industries. It is present in many different kinds of industries a9cd7ee545
