The island is virtually uninhabited, being home to the 524-acre (212-hectare) Bahia Honda State Park. Founded in 1961, the park occupies most of the island. The channel at the island's west end is one of the deepest natural channels in the Florida Keys. cbffdb521b Historically, the most common type of identification key is the dichotomous key, a type of single-access key which offers a fixed sequence of identification steps, each with two alternatives. The earliest examples of identification keys originate in the seventeenth, but their conceptual history can be traced back to antiquity. Modern multi-access keys allow the user to freely choose the identification steps and any order. They were traditionally performed using punched cards but now almost exclusively take the form of computer programs. cbffdb521b The island of Key West is about 4 miles (6 kilometers) long and 1 mile (2 km) wide, with a total land area of 4.2 square miles (11 km2).
