Renault FT The Renault FT's configuration (crew compartment at the front, engine compartment at the back, and main armament in a revolving turret) became and remains the standard tank layout. Consequently, some armoured warfare historians have called the Renault FT the world's first modern tank. The FT was the first production tank to have its armament within a fully rotating turret. Guide number When setting photoflash exposures, the guide number (GN) of photoflash devices (flashbulbs and electronic devices known as "studio strobes", "on-camera flashes", "electronic flashes", "flashes", "speedlights", and "speedlites") is a measure photographers can use to calculate either the required f-stop for any given flash-to-subject distance, or the required distance for any given f-stop. To solve for either of these two variables, one merely divides a device's guide number by the other. Thus, a subject 11 meters or 36 feet away will be correctly illuminated (GN 44 (m) ÷ f/4 = 11 m, and GN 144 (ft) ÷ f/4 = 36 ft). the guide number by 4 cef6a8e279
