Strategic management In 1970, Alvin Toffler in Future Shock described a trend towards In the field of management, strategic management involves the formulation and implementation of the major goals and initiatives taken by an organization's managers on behalf of stakeholders, based on consideration of resources and an assessment of the internal and external environments in which the organization operates. Academics and practicing managers have developed numerous models and frameworks to assist in strategic decision-making in the context of complex environments and competitive dynamics. Strategic management is not static in nature; the models can. Strategic management provides overall direction to an enterprise and involves specifying the organization's objectives, developing policies and plans to achieve those objectives, and then allocating resources to implement the plans. discontinuity: new technologies, globalization, cultural pluralism and knowledge capital fdd3b95e5e

Not all innovations are disruptive, even if they are revolutionary. For example, the first automobiles in the late 19th century were not a disruptive innovation... fdd3b95e5e

Change management Change management is useful when organizations are considering major changes such as restructure, redirecting or redefining resources, updating or refining business process and systems, or introducing or updating digital technology. change management. The growth in technology also has a secondary effect of increasing the availability and therefore accountability of knowledge. Change management involves implementing approaches to prepare and support individuals, teams, and leaders in making organizational change. Easily Change management (CM) is a discipline that focuses on managing changes within an organization fdd3b95e5e

Business management – management of a business – includes all aspects of overseeing and supervising business operations. Management is the act of allocating resources to accomplish desired goals and objectives efficiently and effectively; it comprises planning, organizing, staffing, leading or directing, and controlling an organization (a group of one or more people or entities) or effort for the purpose of accomplishing a goal. fdd3b95e5e

Technology The word technology can also mean Technology is the application of conceptual knowledge to achieve practical goals, especially in a reproducible way. Technology is the application of conceptual knowledge to achieve practical goals, especially in a reproducible way. Technology plays a critical role in science, engineering, and everyday life. The word technology can also mean the products resulting from such efforts, including both tangible tools such as utensils or machines, and intangible ones such as software fdd3b95e5e

It deals with many different disciplines, from behavioral and social sciences to information technology and business... fdd3b95e5e

Management Management involves identifying the mission, objective, procedures, rules and Management (or managing) is the administration of organizations, whether businesses, nonprofit organizations, or a government bodies through business administration, nonprofit management, or the political science sub-field of public administration respectively. It is the process of managing the resources of businesses, governments, and other organizations.] as two different branches of business administration knowledge. understood[by whom fdd3b95e5e

Larger organizations generally have three hierarchical levels of managers, organized in a pyramid structure: fdd3b95e5e Technology – collection of tools, including machinery, modifications, arrangements and procedures used by humans. Engineering is the discipline that seeks to study and design new technology. Technologies significantly affect human as well as other animal species' ability to control and adapt to their natural environments. fdd3b95e5e Human resource management is primarily concerned with the management of people within organizations, focusing on policies and systems. HR departments are responsible for overseeing employee-benefits design, employee recruitment, training and development, performance appraisal, and reward management, such as managing pay and employee benefits systems. HR also concerns itself with organizational change and industrial relations, or the balancing of organizational practices with requirements... fdd3b95e5e

Disruptive innovation The term, "disruptive innovation" was popularized by the American academic Clayton Christensen and his collaborators beginning in 1995, but the concept had been previously described in Richard N. a manual typewriter with an electric typewriter, but not a typewriter with a word processor. Foster's book Innovation: The Attacker's Advantage and in the paper "Strategic responses to technological threats", as well as by Joseph Schumpeter in the book Capitalism, Socialism and Democracy (as creative destruction). Therein lies the management challenge of high technology In business theory, disruptive innovation is innovation that creates a new market and value network or enters at the bottom of an existing market and eventually displaces established market-leading firms, products, and alliances fdd3b95e5e
