Auto mechanic A diesel mechanic repairs diesel engines, often found in trucks and heavy equipment. Basic vehicle maintenance is a fundamental. Based on the concern, the inspection results and preventative maintenance needs, the mechanic/technician returns the findings to the service advisor who then gets approval for any or all of the proposed work. An exhaust system specialist performs repairs to the engine exhaust An auto mechanic is a mechanic who services and repairs automobiles, sometimes specializing in one or more automobile brands or sometimes working with any brand. [1] Seasoned auto repair shops start with a (Digital) Inspection to determine the vehicle conditions, independent of the customers concern. Their work may involve the repair of a specific part or the replacement of one or more parts as assemblies. In fixing cars, their main role is to diagnose and repair the problem accurately. The approved work will be assigned to the mechanic on a work order 1111577e20
