Sc. , (January 28, 1887 – August 2, 1983) was an American biologist known for his works on desert ecology. He was the first to document, in *The Condor*, a state of extended torpor, approaching hibernation, in a bird, the common poorwill. He also described this in the *National Geographic Magazine*. He was born in Loup City, Nebraska to Katherine (née Gunther) and John Philip Jaeger, and moved to Riverside, California in 1906 with his family. California in 1906 with his family

Search for extraterrestrial intelligence Regular operation of the ATA resumed on December 5, 2011. 8-month “hibernation” due to funding shortfalls. In 2012, the ATA was revitalized with a \$3. 6 million The search for extraterrestrial intelligence (usually shortened as SETI) is an expression that refers to the diverse efforts and scientific projects intended to detect extraterrestrial signals, or any evidence of intelligent life beyond Earth

Modern SETI research began in the early 20th century after the advent of radio, expanding with projects like Project Ozma, the Wow! signal detection, and the Breakthrough Listen initiative; a \$100 million...

Ornithology It has also been an area with a large contribution made by amateurs in terms of time, resources, and financial support. hibernation became so well established that even as late as in 1878, Elliott Coues could list as many as 182 contemporary publications dealing with the Ornithology, from Ancient Greek ὄρνις (órnīs), meaning "bird", and -logy from λόγος (lógos), meaning "study", is a branch of zoology dedicated to the study of birds. Several aspects of ornithology differ from related disciplines, due partly to the high visibility and the aesthetic appeal of birds. Studies on birds have helped develop key concepts in biology including evolution, behaviour and ecology such as the definition of species, the process of speciation, instinct, learning, ecological niches, guilds, insular biogeography, phylogeography, and conservation

Mass Effect Shepard, attempts to save the Milky Way galaxy from a race of ancient, hibernating machines known as the Reapers. The franchise depicts a distant future where humanity and several alien civilizations have colonized the galaxy using technology left behind by advanced precursor civilizations. The inaugural video game in the series *Mass Effect* is a military science fiction media franchise created by Casey Hudson

Interstellar travel Although neither is currently Interstellar travel is the hypothetical travel of spacecraft between star systems. These include human hibernation and cryonic preservation. and writers have postulated various techniques for suspended animation. Due to the vast distances between the Solar System and nearby stars, interstellar travel is not practicable with current propulsion technologies

Researchers use methods such as monitoring electromagnetic radiation, searching for optical signals, and investigating potential extraterrestrial artifacts for any signs of transmission from civilizations present on other planets. Some initiatives have also attempted to send messages to hypothetical alien civilizations, such as NASA's Golden Record. As a scientist Klopfer has authored, co-authored or edited twenty-five volumes and more than 125 peer-reviewed articles, most in the field of animal behavior. Among other...

Grizzly bear There is some debate among professionals as to whether grizzly bears technically hibernate: much of this debate revolves around body temperature The grizzly bear (*Ursus arctos horribilis*), also known as the North American brown bear or simply grizzly, is a population or subspecies of the brown bear inhabiting North America. north-facing slopes

Peter Klopfer is an Elected Fellow of the American Association for the Advancement of Science (1963) and the Animal Behavior Society (1968). In 1979–80 he received the Humboldt Research Award for his achievements in the field of Sensory and Behavioral Biology. Eastern brown snake The colour of its surface ranges from pale brown to black, while its underside is pale cream-yellow, often with orange or grey splotches. The species is native to eastern and central Australia and southern New Guinea. September (spring), while the females not until the end of the month. The International Union. The species is oviparous. The concrete slabs of houses have been used by eastern brown snakes hibernating in winter The eastern brown snake (*Pseudonaja textilis*), often referred to as the common brown snake, is a species of extremely venomous snake in the family Elapidae. The eastern brown snake is found in most habitats except dense forests, often in farmland and on the outskirts of urban areas, as such places are populated by its main prey, the house mouse. The adult eastern brown snake has a slender build and can grow to 2 m (7 ft) in length. It was first described by André Marie Constant Duméril, Gabriel Bibron, and Auguste Duméril in 1854

While early ornithology was principally concerned with descriptions and distributions of species, ornithologists... Over the Hedge was theatrically released in the United States on May 19, 2006 and released... To travel between stars within a reasonable amount of time (decades or centuries), an interstellar spacecraft must reach a significant fraction of the speed of light, requiring enormous amounts of energy. Communication with such interstellar craft will experience years of delay due to the speed of light. Collisions with cosmic dust and gas at such speeds can be catastrophic for such spacecrafts. Crewed interstellar travel could possibly be conducted more slowly (far beyond the scale of a human lifetime) by making a generation ship. Hypothetical interstellar propulsion... The franchise originated in a series of video games developed by BioWare and originally published by Microsoft Game Studios on the first two games and its expansions. Later on, the series was taken over by Electronic Arts through its acquisition of BioWare. Each installment is a third-person shooter with role-playing elements. The first three games form a trilogy in which the player character, Commander Shepard, attempts to save the Milky Way galaxy from a race of ancient, hibernating machines known as the Reapers. The inaugural video...

Spring Framework Hibernate (framework) List of Java frameworks Comparison of web frameworks Spring Web Flow spring-projects. “Release v6. The Spring Framework is free and open source software. The framework does not impose any specific programming model. The framework has become popular in the Java community as an addition to the Enterprise JavaBeans (EJB) model. The framework's

In addition to the mainland grizzly (*Ursus arctos horribilis*), other morphological forms of brown bear in North America are sometimes identified as grizzly bears. These include three living populations—the Kodiak bear (*U. a. middendorffi*), the Kamchatka bear (*U. a. beringianus*), and the peninsular grizzly (*U. a. gyas*)—as well as the extinct California grizzly (*U. a. californicus*†) and Mexican grizzly (formerly *U. a. nelsoni*†). On average, grizzly bears near the coast tend to be larger while inland grizzlies tend to be smaller. 1e53fb877d
