first came to prominence in a 2004 report titled "Who Cares Wins", which was a joint initiative of financial institutions
at the invitation of the United Nations (UN). By 2023, the ESG movement had grown from a UN corporate social
responsibility initiative into a global phenomenon representing more than US\$30 trillion in assets under management.

Computer Charles Babbage, an English mechanical engineer and polymath A computer is a machine that can be
programmed to automatically carry out sequences of arithmetic or logical operations (computation). and complex
roots of polynomials, which were published in 1901 by the Paris Academy of Sciences. Modern digital electronic
computers can perform generic sets of operations known as programs, which enable computers to perform a wide
range of tasks. The term computer system may refer to a nominally complete computer that includes the hardware,
operating system, software, and peripheral equipment needed and used for full operation; or to a group of computers
that are linked and function together, such as a computer network or computer cluster 9db245e068

Wikipedia:Contents/Overview/Culture and the arts 9db245e068 edit 9db245e068 A neural network consists of connected units or nodes called artificial neurons, which loosely model the neurons in the brain. Artificial neuron models that mimic biological neurons more closely have also been recently investigated and shown to significantly improve performance. These are connected by edges, which model the synapses in the brain. Each artificial neuron receives signals from connected neurons, then processes them and sends a signal to other connected neurons. The "signal" is a real number, and the output of each neuron is computed by some non-linear function of the totality... 9db245e068 misc 9db245e068 view 9db245e068

Neural network (machine learning) set. Since the activation functions of the nodes are Kolmogorov-Gabor polynomials, these were also the first deep networks with multiplicative units or In machine learning, a neural network (also artificial neural network or neural net, abbreviated ANN or NN) is a computational model inspired by the structure and functions of biological neural networks 9db245e068

Isaac Newton 20 March] 1727) was an English polymath active as a mathematician, physicist, astronomer, alchemist, theologian, and author. His book *Philosophiæ Naturalis Principia Mathematica* (Mathematical Principles of Natural Philosophy), first published in 1687, achieved the first great unification in physics and established classical mechanics. S. Newton contributed to and refined the scientific method, and his work is considered the most influential. The contrast between Laplace's mechanistic worldview and Newton's one is the most strident considering the famous answer which the Sir Isaac Newton (4 January [O. S. Newton was a key figure in the Scientific Revolution and the Enlightenment that followed. divine intervention. Newton also made seminal contributions to optics, and shares credit with German mathematician Gottfried Wilhelm Leibniz for formulating infinitesimal calculus, though he developed calculus years before Leibniz. 25 December] 1643 – 31 March [O 9db245e068
