Review

The other branches of geography, most commonly limited to human geography and physical geography, can usually apply the concepts and techniques of technical geography. Nevertheless, the methods and theory are distinct, and a technical geographer may be more concerned with the technological and theoretical concepts than the nature of the data. Further, a technical geographer may explore the relationship between the spatial technology and the end users to improve upon the technology and better understand the impact of the technology on human behavior. Thus, the spatial data types a technical geographer employs may vary... a38d0b58cf
