List of Dutch discoveries He named it *Bacillus radicola*, which is now placed in Bergey's Manual of Determinative Bacteriology under the genus *Rhizobium*. legumes in 1888. Martinus Beijerinck The following list is composed of objects, concepts, phenomena and processes that were discovered or invented by people from the Netherlands 8a1f09c816

The Taxonomic Outline of Bacteria and Archaea is a derived publication indexing taxon names from version two of the manual. It used to be available for free from the Bergey's manual trust website until... 8a1f09c816 The manual was published subsequent to Bergey's Manual of Determinative Bacteriology, though the latter is still published as a guide for identifying unknown bacteria. First published in 1923 by David Hendricks Bergey, it is used to classify bacteria based on their structural and functional attributes by arranging them into specific familial orders. However, this process has become more empirical in recent years. 8a1f09c816

Diesel engine Reverse flow scavenging is a The diesel engine, named after the German engineer Rudolf Diesel, is an internal combustion engine in which ignition of diesel fuel is caused by the elevated temperature of the air in the cylinder due to mechanical compression; thus, the diesel engine is called a compression-ignition engine (or CI engine). scavenging Reverse flow scavenging Crossflow scavenging is incomplete and limits the stroke, yet some manufacturers used it. This contrasts with engines using spark plug-ignition of the air-fuel mixture, such as a petrol engine (gasoline engine) or a gas engine (using a gaseous fuel like natural gas or liquefied petroleum gas) 8a1f09c816
