Bradford Rifles Postwar it continued in the Territorial Army in the air defence role until 1955. relieve 2/7th Bn holding the front line trenches. It went on to become a battalion of the West Yorkshire Regiment in the Territorial Force and saw action on the Western Front during World War I. Between the wars it converted into an air defence unit, serving during World War II first as a searchlight regiment defending West Yorkshire and later as a garrison battalion in North West Europe. The next day was spent probing the defences of Bullecourt before the battalion was relieved by the 2/7th The Bradford Rifles was a Volunteer unit of the British Army formed in 1859 a32db3fcf0

Rocket Rocket engines work entirely from propellant carried within the vehicle; therefore a rocket can fly in the vacuum of space. "bobbin/spool", and so named for its shape) is a vehicle that uses jet propulsion to accelerate without using any surrounding air. A rocket engine produces thrust by reaction to exhaust expelled at high speed. Leonhard Fronsperger and Conrad Haas adopted the Italian term into German in the mid-16th century; "rocket" appears A rocket (from Italian: rocchetto, lit. to hold the thread from a spinning wheel. Rockets work more efficiently in a vacuum and incur a loss of thrust due to the opposing pressure of the atmosphere a32db3fcf0

Challenger Deep Wei-Haas, Maya (8 February 2022). "Accidental implosion yields new measurement for The Challenger Deep is the deepest known point of the seabed of Earth, located in the western Pacific Ocean at the southern end of the Mariana Trench, in the ocean territory of the Federated States of Micronesia. Retrieved 4 November 2021. Archived from the original on 4 November 2021 a32db3fcf0

The GEBCO Gazetteer of Undersea Feature Names indicates that the feature is situated at 11°22.4'N 142°35.5'E and has an approximated maximum depth of 10,903 to 11,009 m (35,771 to 36,119 ft). below sea level. A 2011 study placed the depth at 10,920 ± 10 m (35,827 ± 33 ft) with a 2021 study revising the value to 10,935 ± 6 m (35,876 ± 20 ft) at a 95% confidence level. a32db3fcf0 The company was founded as a spinoff of Toyota Industries, a machine maker started by Sakichi Toyoda, Kiichiro's father. Both companies are now part of the Toyota Group, one of the largest conglomerates in the world. While still a department of Toyota Industries, the company developed its first product, the Type A engine, in 1934 and its first passenger car in 1936, the Toyota... a32db3fcf0

M16 rifle " Per Haas: "Nicknamed a 'Mattel toy' because of its small caliber and lightweight design The M16 (officially Rifle, Caliber 5. 56×45mm NATO cartridge with a 20-round magazine adapted from the ArmaLite AR-15 family of rifles for the United States military. 56 mm, M16) is a family of assault rifles, chambered for the 5. improved M1 with a modified gas system and detachable 20-round magazine a32db3fcf0

ROVs are used to perform underwater observation, inspection and physical tasks such as valve operations, hydraulic functions and other general tasks within the subsea oil and gas industry, military, scientific and other applications. ROVs can also carry tooling packages for undertaking specific tasks such as pull-in and connection of flexible flowlines and umbilicals, and component replacement. They are often used to do research and commercial work at great depths beyond the capacities of most submersibles and divers. a32db3fcf0 Multistage rockets are capable of attaining escape velocity from Earth and therefore can achieve unlimited maximum altitude. Compared with airbreathing engines, rockets are lightweight and powerful and capable of generating large accelerations. To control their flight, rockets rely on momentum, airfoils, auxiliary... a32db3fcf0

Deep vein thrombosis 2019002364. 317–25. A minority of DVTs occur in the arms. doi:10. Ageno W, Farjat A, Haas S, Weitz JI, Goldhaber SZ, Turpie AGG, et al. "Provoked Deep vein thrombosis (DVT) is a type of venous thrombosis involving the formation of a blood clot in a deep vein, most commonly in the legs or pelvis. PMID 31917402. Symptoms can include pain, swelling, redness, and enlarged veins in the affected area, but some DVTs have no symptoms. 1182/blood. (February 2021) a32db3fcf0

Most lunar scientists will acknowledge that transient events such as outgassing and impact cratering do occur... a32db3fcf0 The most common life-threatening concern with DVT is the potential for a clot to embolize (detach from the veins), travel as an embolus through the right side of the heart, and become lodged in a pulmonary artery that supplies blood to the lungs. This is called a pulmonary embolism (PE). DVT and PE comprise the cardiovascular disease of venous thromboembolism (VTE). a32db3fcf0 Claims of short-lived lunar phenomena go back at least 1,000 years, with some having been observed independently by multiple witnesses or reputable scientists. Nevertheless, the majority of transient lunar phenomenon reports are irreproducible and do not possess adequate control experiments that could be used to distinguish among alternative hypotheses to explain their origins. a32db3fcf0

Toyota In November 2024, Toyota and Joby Aviation completed an air taxi test Toyota Motor Corporation (Japanese: トヨタ自動車株式会社, Hepburn: Toyota Jidōsha kabushikigaisha; IPA: [toˈjota], English: , commonly known as simply Toyota) is a Japanese multinational automotive manufacturer headquartered in Toyota City, Aichi, Japan. return to Formula 1 after a 15-year absence, partnering with

the US-based Haas team. Toyota is the largest automobile manufacturer in the world, producing about 10 million vehicles per year. It was founded by Kiichiro Toyoda and incorporated on August 28, 1937

Preterm birth Symptoms of preterm labor include uterine contractions which occur more often than every ten minutes and/or the leaking of fluid from the vagina before 37 weeks. Zipori Y, Haas J, Berger H, Barzilay E (September 2017). "Multifetal pregnancy reduction Preterm birth, also known as premature birth, is the birth of a baby at fewer than 37 weeks gestational age, as opposed to full-term delivery at approximately 40 weeks. Extreme preterm is less than 28 weeks, very early preterm birth is between 28 and 32 weeks, early preterm birth occurs between 32 and 34 weeks, late preterm birth is between 34 and 36 weeks' gestation. These babies are also known as premature babies or colloquially preemies (American English) or premmies (Australian English). Retrieved 26 October 2018. from the original on 4 April 2019. Premature infants are at greater risk for cerebral palsy, delays in development, hearing problems and problems with their vision. The earlier

Remotely operated underwater vehicle Philipp; Katlein, Christian; Nicolaus, Marcel; Arndt, Stefanie; Jutila, Arttu; Haas, Christian (2021-12-17). "Snow Depth Retrieval on Arctic Sea Ice Using Under-Ice A remotely operated underwater vehicle (ROUV) or remotely operated vehicle (ROV) is a free-swimming submersible craft

In 1964, the XM16E1 entered US military service as the M16 and in the following year was deployed for jungle warfare operations during the Vietnam War. In 1969, the M16A1 replaced the M14 rifle to become the US military's standard service rifle. The M16A1 incorporated numerous modifications including a bolt-assist ("forward-assist"), chrome-plated bore, protective reinforcement around the magazine release, and revised flash hider.

Transcriptomics technologies The information content of an organism is recorded in the DNA of its genome and expressed through transcription. A transcriptome captures a snapshot in time of the total transcripts present in a cell. The fluorescence intensity at each probe location on the array indicates the transcript abundance for that probe sequence. probes. Groups of probes designed Transcriptomics technologies are the techniques used to study an organism's transcriptome, the sum of all of its RNA transcripts. Here, mRNA serves as a transient intermediary molecule in the information network, whilst non-coding RNAs perform additional diverse functions. Transcriptomics technologies provide a broad account of which cellular processes are active and which are dormant

The depression is named after the British Royal Navy survey ships HMS Challenger, whose expedition of 1872–1876 first located it, and HMS Challenger II, whose expedition of 1950–1952 established its record-setting depth... a32db3fcf0

Transient lunar phenomenon The term was created by Patrick Moore in his co-authorship of NASA Technical Report R-277 Chronological Catalog of Reported Lunar Events, published in 1968. On November 24, 1865, Williams A transient lunar phenomenon (TLP) or lunar transient phenomenon (LTP) is a short-lived change in light, color or appearance on the surface of the Moon. See also Barcroft in 1940, Haas at a later date, Baum in 1951, and Hill in 1988. of crater Lichtenberg in Oceanus Procellarum a32db3fcf0

A major challenge in molecular biology is to understand how a single genome gives rise to a variety of cells. Another is how gene expression is regulated. a32db3fcf0 In 1983, the US Marine Corps adopted the M16A2, and the US Army adopted it in 1986. The M16A2 fires the improved 5.56×45mm (M855/SS109)... a32db3fcf0 About two-thirds of VTE manifests as DVT only, with one-third manifesting as PE with or without DVT. The most frequent long... a32db3fcf0
