Formative assessment It is commonly contrasted with summative assessment, which. facilitators to foster students' target language ability. It typically involves qualitative feedback (rather than scores) for both student and teacher that focuses on the details of content and performance. In classroom, short quizzes, inflectional journals, or portfolios could be used as a formative assessment Formative assessment, formative evaluation, formative feedback, or assessment for learning, including diagnostic testing, is a range of formal and informal assessment procedures conducted by teachers during the learning process in order to modify teaching and learning activities to improve student attainment. It also helps faculty recognize where students are struggling and address problems immediately. The goal of a formative assessment is to monitor student learning to provide ongoing feedback that can help students identify their strengths and weaknesses and target areas that need work 6c96256d2f

Systems for co-located audiences combine wireless hardware with presentation software. Systems for remote audiences may use telephones or web polls for audiences watching through television or the internet. Various names are used for this technology, including real-time response, the worm, dial testing, and Audience Response meters. In educational settings, such systems are often called "student response systems" or "personal response systems". The hand-held remote control that students use to convey their responses to questions is often called a "clicker". 6c96256d2f
