

File

Text file A text file (sometimes spelled textfile; an old alternative name is flat file) is a kind of computer file that is structured as a sequence of lines of A text file (sometimes spelled textfile; an old alternative name is flat file) is a kind of computer file that is structured as a sequence of lines of electronic text. A text file exists stored as data within a computer file system 6f62e349c9

== Etymology == 6f62e349c9 In an early society in which most people were illiterate – including its hierarchy of chieftains, sub-kings and kings – the oral tradition was an important means of communicating current news and historical events. As both a poet and storyteller, the fili would hope to gain a professional reputation for the 6f62e349c9 Filé powder is made by harvesting the young leaves and stems of the sassafras tree and grinding them. Filé powder is generally not added until after the vegetables and meats or seafood are finished cooking and removed from the heat source. 6f62e349c9 A portion of the computer main memory can be set up as a RAM disk that serves as a storage device for a file system. File systems such as tmpfs can store files in virtual memory. 6f62e349c9 There are many file system designs and implementations – with various structures and features and various resulting characteristics such as speed, flexibility, security, size, and more. 6f62e349c9 **== Features ==** 6f62e349c9 In operating systems such as CP/M, where the operating system does not keep track of the file size in bytes, the end of a text file is denoted by placing one or more special characters, known as an end-of-file (EOF) marker, as padding after the last line in a text file. In modern operating systems such as DOS, Microsoft Windows and Unix-like systems, text files do not contain any special EOF character, because file systems on those operating systems keep track of the file size in bytes. 6f62e349c9 Some operating systems, such as Multics, Unix-like systems, CP/M, DOS, the classic Mac OS, and Windows, store text files as a sequence of bytes, with an end-of-line delimiter at the end of each line. Other operating systems, such as OpenVMS and OS/360 and its successors, have record-oriented filesystems, in which text files are stored as a sequence either of fixed-length records or of variable-length records with a record-length value in the record header. 6f62e349c9

Clustered file system There are several approaches to clustering A clustered file system (CFS) is a file system which is shared by being simultaneously mounted on multiple servers. A clustered file system (CFS) is a file system which is shared by being simultaneously mounted on multiple servers. Clustered file systems can provide features like location-independent addressing and redundancy which improve reliability or reduce the complexity of the other parts of the cluster. Parallel file systems are a type of clustered file system that spread data across multiple storage nodes, usually for redundancy or performance. There are several approaches to clustering, most of which do not employ a clustered file system (only direct attached storage for each node) 6f62e349c9

Files can be shared with and transferred between computers and mobile devices via removable media, networks, or the Internet. 6f62e349c9

== Shared-disk file system == 6f62e349c9 A virtual file system provides access to files that are either computed on request, called virtual files... 6f62e349c9 The word "fili" is thought to derive from the Proto... 6f62e349c9

File Look up file, files, or filing in Wiktionary, the free dictionary. File, Files, or filing may refer to: File (tool), a tool used for removing fine amounts File, Files, or filing may refer to:

6f62e349c9

An etymology from PIE welo- is offered by Matasović. 6f62e349c9 == Culinary use == 6f62e349c9

File descriptor computer operating systems, a file descriptor (FD, less frequently fildes) is a process-unique identifier (handle) for a file or other input/output resource In Unix and Unix-like computer operating systems, a file descriptor (FD, less frequently fildes) is a process-unique identifier (handle) for a file or other input/output resource, such as a pipe or network socket 6f62e349c9

Binary file The term "binary file" is often used as a term meaning "non-text file". Many binary file formats A binary file is a computer file that is not a text file. Many binary file formats contain parts that can be interpreted as text; for example, some computer document files containing formatted text, such as older Microsoft Word document files, contain the text of the document but also contain formatting information in binary form. binary file is a computer file that is not a text file. The term "binary file" is often used as a term meaning "non-text file" 6f62e349c9

Different types of computer files are designed for different purposes. A file may be designed to store a written message, a document, a spreadsheet, an image, a video, a program, or any wide variety of other kinds of data. Certain files can store multiple data types at once. 6f62e349c9

Computer file Everything is a file File camouflage File copying File conversion File deletion File directory File manager File system Filename Flat-file database Object A computer file is a named collection of data treated as a unit by the system that manages it. Many older computer systems lacked a distinct file system per se, yet a management feature is required in order to provide a file abstraction. Today, this system is called a file system 6f62e349c9

Filé powder is used in Louisiana Creole cuisine in the making of some types of gumbo, a thick Creole soup or stew often served over rice. Several different varieties exist. In New Orleans, what is known as Creole gumbo generally varies from house to house though still retaining its Native American origins. The Creoles of Cane River make a gumbo focused

much more on filé. Filé can provide thickening when okra is not in season, in types of gumbo that use okra or a roux as a thickener for gumbo instead of filé. Sprinkled sparingly over gumbo as a seasoning and a thickening agent, filé powder adds a distinctive, earthy flavor and texture. 6f62e349c9 Nail file, a tool used to gently abrade away and shape the edges of fingernails and toenails 6f62e349c9

File system A distributed file system is a protocol that provides file access between networked computers. A local file system is a capability of In computing, a file system or filesystem (often abbreviated to FS or fs) governs file organization and access. In computing, a file system or filesystem (often abbreviated to FS or fs) governs file organization and access. A local file system is a capability of an operating system that services the applications running on the same computer 6f62e349c9

File systems have been developed for many types of storage devices, including hard disk drives (HDDs), solid-state drives (SSDs), magnetic tapes and optical discs. 6f62e349c9 Filing (metalworking), a material removal process in manufacturing 6f62e349c9 == Overview == 6f62e349c9 "Text file" refers... 6f62e349c9 == Etymology == 6f62e349c9
