== History == c073358c6c The International Search and Rescue Advisory Group (INSARAG) is a UN organisation that promotes the exchange of information between national urban search and rescue organisations. The duty to render assistance is covered by Article 98 of the UNCLOS. c073358c6c There are many different definitions of search and rescue, depending on the agency involved and country in question. c073358c6c Under Section 18(5)a of the... c073358c6c Windows Search creates a local Index of files — audio tracks, documents, folders, programs, photos, and videos — as well as of non-file items such as contacts and messages of Microsoft Outlook and their metadata for which users can

perform incremental searches based on details such as contents, dates, names, types, and sizes; the Index consists of prose within files and items and metadata properties. Control Panel and Settings can also be searched. c073358c6c == By content/topic == c073358c6c

Search engine Users submit their queries through a web browser or a mobile app, and the results page generally displays a collection of hyperlinks together with brief descriptions and relevant images. Users also have the option of limiting a search to specific types of results, such as images, videos, or news. The term search engine refers to a search application that provides links to web pages and other relevant information on the Web (or the Internet in general) The term search engine refers to a search application that provides links to web pages and other relevant information on

the Web (or the Internet in general) in response to a user's query

Search algorithm In computer science, a search algorithm is an algorithm designed to solve a search problem. Search algorithms work to retrieve information stored within In computer science, a search algorithm is an algorithm designed to solve a search problem. Search algorithms work to retrieve information stored within particular data structure, or calculated in the search space of a problem domain, with either discrete or continuous values

Binary search runs in logarithmic time in the worst case, making The appropriate search algorithm to use often depends on the data structure being searched, and may also include prior knowledge about the data. Search algorithms can be made

faster or more efficient by specially constructed database structures, such as search trees, hash maps, and database indexes. There have been many search engines since the dawn of the Web in the 1990s; Google Search became the dominant one in the 2000s and has remained so. As of May 2025, according to StatCounter, Google held approximately 89–90 % of the worldwide search share, with competitors trailing far behind: Bing... (In England and Wales, a local magistrate issues search warrants, which require that a constable provide evidence that supports the warrant application. Although search engines use search algorithms, they belong to the study of information retrieval, not algorithmics.

Strip search The search may

involve an official performing an intimate person search and inspecting their personal effects and body cavities (mouth, vagina, rectum, etc.).

Regulations covering strip searches vary considerably and may be mandatory in some situations or discretionary in others. frisk search, but by requiring the person to remove some or all clothing. The search may involve an official performing an intimate person search and inspecting A strip search is a practice of searching a person for weapons or other contraband suspected of being hidden on their body or inside their clothing, and not found by performing a frisk search, but by requiring the person to remove some or all clothing. A strip search is more intrusive than a frisk and requires legal authority

c073358c6c Jurisdictions that
respect the rule of law and a
right to privacy constrain police
powers, and typically require
search warrants or an
equivalent procedure for
searches police conducted in

the course of a criminal investigation. The laws usually make an exception for hot pursuit: a police officer following a criminal who has fled the scene of a crime has the right to enter a property where the criminal has sought shelter. The necessity for a search warrant and its abilities vary from country to country. In certain authoritarian nations, police officers may be allowed to search individuals and private property without having to obtain permission or provide justification for their actions.

Search warrant In most countries, a search warrant cannot be issued in aid of civil process. A search warrant is a court order that a magistrate or judge issues to authorise law enforcement officers to conduct a search of a person, location, or A search warrant is a court order that a magistrate or judge issues to authorise law

enforcement officers to conduct a search of a person, location, or vehicle for evidence of a crime and to confiscate any evidence they find

== United Kingdom ==
For a search provider, its engine is part of a distributed computing system that can encompass many data centers throughout the world. The speed and accuracy of an engine's response to a query are based on a complex system of indexing that is continuously updated by automated web crawlers. This can include data mining the files and databases stored on web servers, although some content is not accessible to crawlers.
== Legality of strip searches ==

== Film == c073358c6c
c073358c6c Search algorithms can be classified based on their mechanism of searching into three types of algorithms: linear, binary, and hashing. Linear search algorithms check every record for the one associated with a target key in a linear fashion. Binary, or half-interval, searches repeatedly target the center of the search structure and divide the search space in half. Comparison search algorithms improve on linear searching by successively eliminating records based on comparisons of the keys until the target... c073358c6c The Search (1948 film), an American drama film directed by Fred Zinnemann and starring Montgomery Clift c073358c6c
