Agile Manifesto Agile Glossary of the Agile Alliance The New Methodology Martin Fowler's - Agile software development is an umbrella term for approaches to developing software that reflect the values and principles agreed upon by The Agile Alliance, a group of 17 software practitioners, in 2001 e8328fb49f

Dimensional modeling Ralph Kimball; Margy Ross (26 April 2002). Principles and Methodologies. An alternative approach from Inmon advocates a top down design of the model of all the enterprise data using tools such as entity-relationship modeling (ER). The approach focuses on identifying the key business processes within a business and modelling and implementing these first before adding additional business processes, as a bottom-up approach. ISBN 978-0-07-161039-1. McGraw-Hill Osborne Media. The Data Warehouse Toolkit: The Dimensional modeling is part of the Business Dimensional Lifecycle methodology developed by Ralph Kimball which includes a set of methods, techniques and concepts for use in data warehouse design e8328fb49f

PRDs are most frequently written for software products, but they can be used for any type of product and also for services. e8328fb49f

Computer-aided software engineering CASE tools are similar to and are partly inspired by computer-aided design (CAD) tools used for designing hardware products. CASE tools are intended to help develop high-quality, defect-free, and maintainable software. CASE software was often associated with methods for the development of information systems together with automated tools that could be used in the software development process. project Eagle as an alternative to Foundation. Several of the thought leaders in object-oriented development each developed their own methodology and Computer-aided software engineering (CASE) is a domain of software tools used to design and implement applications e8328fb49f

Over the last few years, the Zope community has spawned several additional web frameworks with disparate aims and principles, but sharing philosophy, people, and source code. Zope 2 is still the most widespread of these frameworks, largely thanks to the Plone content management system, which runs on Zope 2. BlueBream (earlier called Zope 3) is less widespread but underlies several large sites, including Launchpad. Grok was started as a... e8328fb49f Individuals and interactions over

Project-based learning Project-based learning contrasts with paper-based, rote memorization, or teacher-led instruction that presents established facts or portrays a smooth path to knowledge by instead posing questions, problems, or scenarios. teaching and learning into a methodology known as "project-based learning". It is a style of active learning and inquiry-based learning. William Heard Kilpatrick built on the theory of Dewey, who was his teacher, and introduced Project-based learning is a teaching method that involves a dynamic classroom approach in which it is believed that students acquire a deeper knowledge through active exploration of real-world challenges and problems. Students learn about a subject by working for an extended period of time to investigate and respond to a complex question, challenge, or problem

Kimball lifecycle The methodology "covers a sequence The Kimball lifecycle is a methodology for developing data warehouses, and has been developed by Ralph Kimball and a variety of colleagues. It is considered a "bottom-up" approach to data warehousing as pioneered by Ralph Kimball, in contrast to the older "top-down" approach pioneered by Bill Inmon. lifecycle is a methodology for developing data warehouses, and has been developed by Ralph Kimball and a variety of colleagues. The methodology "covers a sequence of high level tasks for the effective design, development and deployment" of a data warehouse or business intelligence system

The practitioners cite inspiration from new practices at the time including extreme programming, scrum, dynamic systems development method, adaptive software development, and being sympathetic to the need for an alternative to documentation-driven, heavyweight software development processes. Responding to change over following a plan The CAD domain has always been an early adopter of software-engineering techniques used in knowledge-based systems, such as object-orientation and rules. Knowledge-based engineering integrates these technologies with CAD and other traditional engineering software tools. Customer collaboration over contract negotiation

NeWS Rosenthal. Sun also shipped an earlier "Lite" toolkit intended for example purposes and making small programs NeWS (Network extensible Window System) is a discontinued windowing system developed by Sun Microsystems in the mid-1980s. Originally known as "SunDew", its primary authors were James Gosling and David S. is TNT (The NeWS Toolkit) which Sun released in 1989. Like PostScript, NeWS could be used as a complete programming language, but unlike PostScript,

NeWS could be used to make complete interactive programs with mouse support and a GUI. The NeWS interpreter was based on PostScript (as was the later Display PostScript, although the two projects were otherwise unrelated) extending it to allow interaction and multiple "contexts" to support windows. It is written to allow people to understand what a product should do. A PRD should, however, generally avoid anticipating or defining how the product will do it in order to later allow interface designers and engineers to use their expertise to provide the optimal solution to the requirements. e8328fb49f Benefits of KBE include improved collaboration of the design team due to knowledge management... e8328fb49f Typically, a PRD is created from a user's point-of-view by a user/client or a company's marketing department (in the latter case it may also be called a Marketing Requirements Document (MRD)). The requirements are then analyzed by a (potential) maker/supplier from a more technical... e8328fb49f The primary reference for disciplined agile delivery is the book Choose Your WoW!, written by Scott Ambler and Mark Lines. WoW refers to "way of working" or "ways of working". e8328fb49f

Disciplined agile delivery portion of the Disciplined Agile Toolkit.
