of a procedure was not changed but the procedure was partially reduced or eliminated -53 means terminated procedure: this modifier is used when the clinician makes a conscious decision to terminate the procedure for the safety or welfare of the patient

How Are the Procedures Valued?

Survey conducted asking participants to compare professional component of the surveyed code to professional component of other established procedures. Relative value of surveyed code established on basis of other procedures of similar difficulty and time. Result is a Relative Value Unit (RVU), a non-monetary value that ranks the time and intensity of the work effort. Final value established by an American Medical Association (AMA) Committee called the AMA/Specialty Society RVS (Relative Value Scale) Update Committee or RUC
