Women in science 1795. Historians with an interest in gender and science have researched the scientific endeavors and accomplishments of women, the barriers they have faced, and the strategies implemented to have their work peer-reviewed and accepted in major scientific journals and other publications. Five of her comets were published in Philosophical Transactions, a packet of paper bearing the superscription, "This is what I call the Bills and The presence of women in science spans the earliest times of the history of science wherein they have made substantial contributions. The historical, critical, and sociological study of these issues has become an academic discipline in its own right 7e2f8a1574

Milk It is the primary source of nutrition for young mammals (including breastfed human infants) before they are able to digest solid food. The first milk, which is called colostrum, contains antibodies and immune-modulating components that strengthen the immune system against many diseases. several global locations from as early as 9000–7000 BC in Mesopotamia to 3500–3000 BC in the Americas. Immune factors and immune-modulating components in milk contribute to milk immunity. People first domesticated the most important dairy animals – Milk is a white liquid food produced by the mammary glands of lactating mammals. Milk contains many nutrients, including calcium and protein, as well as lactose and saturated fat; the enzyme lactase is needed to break down lactose 7e2f8a1574
