Breastfeeding The World Health Organization (WHO) recommend that breastfeeding begin within the first hour of a baby's birth and continue as the baby wants. This means that no other foods or drinks, other than vitamin D, are typically given. Between 2015 and 2020, only 44% of infants were exclusively breastfed in the first six months of. The WHO recommends exclusive breastfeeding for the first 6 months of life, followed by continued breastfeeding with appropriate complementary foods for up to 2 years and beyond. Infants may suck the milk directly from the breast, or milk may be extracted with a pump and then fed to the infant. One way to help the infant achieve a deep latch is to compress the breast tissue into a "U"; Breastfeeding, also known as nursing, is the process where breast milk is fed to a child. Health organizations, including the WHO, recommend breastfeeding exclusively for six months. nipple to induce the baby to

Criticism of pseudoscience, generally by the scientific community or skeptical organizations, involves critiques of the logical, methodological, or rhetorical bases of the topic in question. Though some of the listed topics continue to be investigated scientifically, others were only subject to scientific research in the past and today are considered refuted, but resurrected in a pseudoscientific...
