Economy of India under the British Raj sharp breaks with the traditional economy, and that control was largely left in the hands of regional rulers. The economy was sustained by general conditions The role and scale of British imperial policy during the British Raj (1858 to 1947) on India's relative decline in global GDP remains a topic of debate among economists, historians, and politicians. Some commentators argue that the effect of British rule was negative, and that Britain engaged in a policy of deindustrialisation in India for the benefit of British exporters, which left Indians relatively poorer than before British rule. Others argue that Britain's impact on India was either broadly neutral or positive, and that India's declining share of global GDP was due to other factors, such as new mass production technologies or internal ethnic conflict b5dba67f9e
