These terms may mean different things in different contexts. Very often, diatonic refers to musical elements derived from the modes and transpositions of the "white note scale" C-D-E-F-G-A-B. In some usages it includes all forms of heptatonic scale that are in common use in Western music (the major, and all forms of the minor). 503fc67fcc

Music theory ". Music theory is the study of theoretical frameworks for understanding the practices and possibilities of music. The musicological approach to theory differs from music analysis "in that it takes as its starting-point not the individual work or performance but the fundamental materials from which it is built. The Oxford Companion to Music describes three interrelated uses of the term "music theory": The first is the "rudiments", that are needed to understand music notation (key signatures, time signatures, and rhythmic notation); the second is learning scholars' views on music from antiquity to the present; the third is a sub-topic of musicology that "seeks to define processes and general principles in music". Theory of reasoned action It is mainly used to The theory of reasoned action (TRA or ToRA) aims to explain the relationship between attitudes and behaviors within human action. The theory of reasoned action (TRA or ToRA) aims to explain the relationship between attitudes and behaviors within human action. The TRA was later revised. Fishbein's theories suggested a relationship between attitude and behaviors (the A-B relationship). It is mainly used to predict how individuals will behave based on their pre-existing attitudes and behavioral intentions. However, critics estimated that attitude theories were not proving to be good indicators of human behavior. An individual's decision to engage in a particular behavior is based on the outcomes the individual expects will come as a result of performing the behavior. Developed by Martin Fishbein and Icek Ajzen in 1967, the theory derived from previous research in social psychology, persuasion models, and attitude theories 503fc67fcc

Some distinctive doctrines of the Seventh-Day Adventist church... 503fc67fcc Its most common use may be described as a type of musical scale coupled with a set of characteristic melodic and harmonic behaviors. It is applied to major and minor keys as well as the seven diatonic modes (including the former as Ionian and Aeolian) which are defined by their starting note or tonic. (Olivier Messiaen's modes of limited transposition are strictly a scale type.) Related to the diatonic modes are the eight church modes or Gregorian modes, in which authentic and plagal forms of scales are distinguished by ambitus and tenor or reciting tone. Although both diatonic and Gregorian modes borrow terminology from ancient Greece, the Greek tonoi do not otherwise resemble their medieval/modern... 503fc67fcc
