

The Outward Mindset Seeing Beyond Ourselves

Zionism in Palestine had a colonial mindset. Zionists wanted to create a Jewish state in Palestine with as much land, as many Jews, and as few Palestinian Arabs as possible. Anita Shapira and Shlomo Ben-Ami also emphasize the importance of the "ethos" of the movement, framing Zionism as Zionism is an ethnic nationalist movement that emerged in late 19th-century Europe to establish and support a Jewish homeland through colonization in the region of Palestine, which roughly corresponds to the Land of Israel in Judaism—itself central to Jewish history. Zionism was the main force behind the creation of the State of Israel in 1948, and remains the country's dominant ideology today 27c544bdf3

However, we have countless categories divided by gender, and at CfD discussions, especially about gender, this guideline proves to be problematic or outdated, and seems to indicate that the rule against categorization by gender is not supported or applied widely enough to be in a guideline. In some cases it even leads to sexist different treatment of men and women. See e.g. Wikipedia:Categories for discussion/Log/2026_May_28#Category:American male rock singers or Wikipedia:Categories for discussion/Log/2026 April 21#Category:Men by role. However, the alcoholic content of ancient alcoholic beverages was significantly lower than that of modern alcoholic beverages. abstinence, is the biblical norm. The ancient Canons of the Apostles Christian views on alcohol are varied. The low alcoholic content was due to the limitations of fermentation and the nonexistence of distillation methods in the ancient world. On the first point, moderationists reflect the Hebrew mindset that all creation is good. Throughout the first 1,800 years of Church history, Christians generally consumed alcoholic beverages as a common part of everyday life and used "the fruit of the vine" in their central rite—the Eucharist or Lord's Supper 27c544bdf3

I, truly understand that the restrictions imposed on me might not be uplifted. I honor all decisions of the Admins and I am following their advice. Despite my conversations with @Deepfriedokra on their talk page, I have changed my mind to come here for consideration. 27c544bdf3 Zionism initially emerged in Central and Eastern Europe as

a secular nationalist movement in the late 19th century, in reaction to new waves of antisemitism and in response to the Haskalah, or Jewish Enlightenment. By the beginning of the 20th century, the Zionist movement, led by Theodor Herzl, associated this national revival with lands in Palestine, a region then under Ottoman rule. The arrival of Zionist settlers in Palestine during this period is widely seen as marking the start of the Israeli-Palestinian conflict. The Zionist claim to Palestine was based on the notion that the Jews' historical right to the land outweighed that of the Arabs.

The embodied mind thesis challenges other theories, such as cognitivism, computationalism, and Cartesian dualism. It is closely related to the extended mind thesis, situated cognition, and enactivism. The modern version depends on understandings drawn from up-to-date research in psychology, linguistics, cognitive science, dynamical systems, artificial intelligence, robotics, animal cognition, plant cognition, and neurobiology.

The 2012 phenomenon was a range of eschatological beliefs that cataclysmic or transformative events would occur on or around 21 December 2012. This date was regarded as the end-date of a 5,126-year-long cycle in the Mesoamerican Long Count calendar, and festivities took place on 21 December 2012 to commemorate the event in the countries that were part of the Maya civilization (Mexico, Belize, Guatemala, Honduras and El Salvador), with main events at Chichén Itzá in Mexico and Tikal in Guatemala

I wrote the following before becoming aware of the ANI report almost immediately above ((since archived)), but it is in any case a separate issue. Dreadstar writes there, "I've fully protected the article due to edit warring. I've also removed the material identified as a potential BLP violation. Work it out on the article talk page. Dreadstar † 23:36, 13 October 2014 (UTC)" But this is not ok. You don't get to win edit wars and delete what you want merely by alleging a BLP vio. Some consideration must be given to whether the allegation is simply gaming the system.

Hi all. Just a short note to say that one of Beh-nam's usual IP ranges has now been blocked AO/ACB for 1 month. The range is 70.48.244.0/22, revealed here per checkuser policy due to the nature and extent of this editor's disruption. To ensure a certain balance, NisarKand is likely to be next on the list. Enough people are tired of both of these banned editors warring against each other and filing checkuser reports. Beh-nam has other ranges, but this will likely slow him down a bit and we can address other ranges as necessary. In the mid-19th century, some Protestant Christians moved from a position of allowing moderate use of alcohol (sometimes called "moderationism") to either deciding that not imbibing was wisest in the present circumstances ("abstentionism") or prohibiting all ordinary consumption of alcohol because it was believed to be a sin ("prohibitionism"). Many Protestant churches, particularly Methodists, advocated abstentionism or prohibitionism and were early leaders in the temperance movement of the... 27c544bdf3

Embodied cognition Embodied cognition suggests that these elements are essential to a wide spectrum of cognitive functions, such as perception biases, memory recall, comprehension and high-level mental constructs (such as meaning attribution and categories) and performance on various cognitive tasks (reasoning or judgment). These embodied factors include the motor system, the perceptual system, bodily interactions with the environment (situatedness), and the assumptions about the world that shape the functional structure of the brain and body of the organism.

embodiment thesis, the extended mind thesis limits cognitive processing neither to the brain nor even to the body, it extends it outward into the agent's world. Embodied cognition represents a diverse group of theories which investigate how cognition is shaped by the bodily state and capacities of the organism.
