Since the beginning of the 20th century, Australia has experienced an increase of over 1.5 °C in average annual temperatures, with warming occurring at twice the rate over the past 50 years compared with the previous 50 years. Recent climate events such as extremely high temperatures and widespread drought have focused government and public attention on the effects of climate change in Australia. Rainfall in southwestern Australia has decreased by 10–20% since the 1970s, while... 0bc2eba0c7

Ethylene glycol is a colorless, odorless, sweet liquid, commonly found in antifreeze. It may be drunk accidentally or intentionally in a suicide attempt. When broken down by the body it results in glycolic acid and oxalic acid which cause most of the toxicity. The diagnosis may be suspected when calcium oxalate crystals are seen in the urine or when acidosis or an increased osmol gap is present... The term is often used by critics of wage-based employment to criticize the exploitation of labor and social stratification, with the former seen primarily as unequal bargaining power between labor and capital, particularly when workers are paid comparatively low wages, such as in sweatshops, and the latter is described as a lack of workers' self-management, fulfilling job choices and leisure in an economy. The criticism...

Scallops are a cosmopolitan family of bivalves found in all of the world's oceans, although never in fresh water. They are one of the very few groups of bivalves to be primarily "free-living", with many species capable of rapidly swimming short distances and even migrating some distance across the ocean floor. A small minority of scallop species live cemented to rocky substrates as adults, while others attach themselves to stationary or rooted objects such as seagrass at some...

Climate change in Australia "Drought, drying and climate Climate change has been a

critical issue in Australia since the beginning of the 21st century. Climate issues include wildfires, heatwaves, cyclones, rising sea levels, and erosion. Australia is becoming hotter and more prone to extreme heat, bushfires, droughts, floods, and longer fire seasons because of climate change. 1890/120251.
