Solution

Risk Many different definitions have been proposed. Risk involves uncertainty about the effects/implications of an activity with respect to something that humans value (such as health, well-being, wealth, property or the environment), often focusing on negative, undesirable consequences. The solution is "to allow for different perspectives on In simple terms, risk is the possibility of something bad happening. One international standard definition of risk is the "effect of uncertainty on objectives". concludes that "experience has shown that to agree on one unified set of definitions is not realistic"

The understanding of risk, the methods of assessment and management, the descriptions of risk and even the definitions of risk differ in different practice areas (business, economics, environment, finance, information technology, health, insurance, safety, security, privacy, etc). This article provides links to more detailed articles on these areas. The...
