Richard Stallman Varghese, Sam.
He campaigns for software to be distributed in such a manner that its users have the freedom to use, study, distribute, and modify that software. Retrieved March 25, 2021. "iWire Pro-Stallman group issues open letter, wants him to stay on - Richard Matthew Stallman (STAWL-mən; born March 16, 1953), also known by his initials, rms, is an American free software movement activist and programmer. Software which ensures these freedoms is termed free software. 2021. Stallman launched the GNU Project, founded the Free Software

Foundation (FSF) in October 1985, developed the GNU Compiler Collection and GNU Emacs, and wrote all versions of the GNU General Public License. "An open letter in support of RMS"

CPU cache Intel. 5. Retrieved 2012-01-26. 2006. Access Archived from the original (PDF) on 2011-12-29. Intel Iris Pro 5200 Graphics Review: Core i7-4950HQ A CPU cache is a hardware cache used by the central processing unit (CPU) of a computer to reduce the average cost (time or energy) to access data from the main memory. A cache is a smaller, faster memory, located closer to a processor core, which stores copies of the data from frequently used main memory locations, avoiding the need to always refer to main memory which may be tens to hundreds of times slower to access

Reddy (born 13 June 1937) is an
Indian-American computer
scientist and a winner of the

Turing Award. college. He was the first person of Asian origin to receive the Turing Award, in 1994, sometimes known as the Nobel Prize of computer science, for his work in the field of artificial intelligence. He was the founding director of the Robotics Institute at Carnegie Mellon University. He was instrumental in helping to create Rajiv Gandhi University of Knowledge Technologies in India, to cater to the educational needs of the low-income, gifted, rural youth. He is one of the early pioneers of artificial intelligence and has served on the faculty of Stanford and Carnegie Mellon for over 50 years. He was the founding chairman of International Institute of Information Technology, Hyderabad aed2b8323c

Stallman launched the GNU Project in September 1983 to write a Unix-like computer operating system composed entirely of free software. With that he also launched the free

software movement. He has been the GNU project's lead architect...

aed2b8323c Cache memory is typically implemented with static random-access memory (SRAM),

which requires multiple transistors to store a single bit.

This makes it expensive in terms of the area it takes up, and in

modern CPUs the cache is typically the largest part by chip area. The size of the cache needs to be balanced with the general

desire for smaller chips which cost less. Some modern...

aed2b8323c Solaris was registered as compliant with the

Single UNIX Specification until April 29, 2019. Historically,

Solaris was developed as proprietary software. In June 2005, Sun Microsystems released most of the codebase under the CDDL license, and founded the OpenSolaris open-source project.

Sun aimed to build a developer and user community with OpenSolaris... aed2b8323c

Unmanned aerial vehicle

Srivastava, Gaurav; Singhal, Jayant; Varghese, A. (January 2021). ; Jha, C. ; Rajashekar, G. V.

“Remote sensing An unmanned aerial vehicle (UAV) or unmanned aircraft system (UAS), commonly known as a drone, is an aircraft with no human pilot, crew, or passengers on board, but rather is controlled remotely or is autonomous. O. S. These include aerial photography, area coverage, precision agriculture, forest fire monitoring, river monitoring, environmental monitoring, weather observation, policing and surveillance, infrastructure inspections, smuggling, product deliveries, entertainment and drone racing. As control technologies improved and costs fell, their use expanded to many non-military applications. UAVs were originally developed through the twentieth century for military missions too "dull, dirty or dangerous" for humans, and by the twenty-first, they had become essential assets to most militaries. N. ; Rao, P. ; Padalia,

Hitendra; Ayyappan, N

Dortmund With a population of 614,495 inhabitants, it is the largest city (by area and population) of the Ruhr as well as the largest city of Westphalia. Dortmund is the second-largest city in the Low German dialect area, after Hamburg. It lies on the Emscher and Ruhr rivers (tributaries of the Rhine) in the Rhine-Ruhr Metropolitan Region, the second biggest metropolitan region by GDP in the European Union, and is considered the administrative, commercial, and

cultural centre of the eastern Ruhr. Ludwig Kirchner, Otto Mueller, Emil Nolde, and graphics by Pablo Picasso from the 1940s and 1950s, plus others by Joan Miró, Marc Chagall, and Salvador Dalí Dortmund (German: ['dɔʁtmʊnt] ; Westphalian: Döörpm ['dy:œpɪm]; Latin: Tremonia) is the third-largest city in North Rhine-Westphalia, after Cologne and Düsseldorf, and the ninth-largest city in Germany

Intel It was one of the first companies listed on Nasdaq. Intel designs, manufactures, and sells computer components such as central processing units (CPUs) and related products for business and consumer markets. It was the world's third-largest semiconductor chip manufacturer by revenue in 2024 and has been included in the Fortune 500 list of the largest United States corporations by revenue since 2007. (GPU) Intel Developer Zone (Intel DZ) Intel GMA (Graphics Media Accelerator) Intel Graphics Technology Intel Corporation is an American multinational corporation, partially state-owned and technology company headquartered in Santa Clara, California aed2b8323c

Oracle Solaris seem to care about Solaris 11 code leak on Ars Technica by Sean Gallagher (Dec 21, 2011) Varghese, Sam. "Bye, bye Solaris, it was a nice ride while it lasted" Oracle Solaris is a proprietary Unix operating system offered by Oracle for SPARC and x86-64 based workstations and servers. Originally developed by Sun Microsystems as Solaris, it superseded the company's earlier SunOS in 1993 and became known for its scalability, especially on SPARC systems, and for originating many innovative features such as DTrace, ZFS and Time Slider. After the Sun acquisition by Oracle in 2010, it

was renamed Oracle Solaris

Intel supplies microprocessors for most manufacturers of computer systems, and is one of the developers of the x86 series of instruction sets found in most personal computers (PCs). It also manufactures chipsets, network interface controllers, flash memory... aed2b8323c

Software patent "New Zealand says no to software patents". 2010-07-15.

Government A software patent is a patent on a piece of software, such as a computer program, library, user interface, or algorithm. Retrieved 2012-10-09.

This gray area, along with the difficulty of patent evaluation for intangible, technical works such as libraries and algorithms, makes software patents a frequent subject of controversy and litigation. Varghese, Sam (16 July 2010). Archived from the original on 2010-09-20. The

validity of these patents can be difficult to evaluate, as software is often at once a product of engineering, something typically eligible for patents, and an abstract concept, which is typically not

List of Christians in science and technology People in this list should have their Christianity as relevant to their notable activities or public life, and who have publicly identified themselves as Christians or as of a Christian denomination.
