Auction baskets where bidding is "lot";, and the hammer price is \$5. The branch of economic theory dealing with auction types and participants' behavior

in auctions is called auction theory. The winner must pay \$5 (as the price is for the whole lot) and must take all five baskets An auction is usually a process of buying and selling goods or services by offering them up for bids, taking bids, and then selling the item to the highest bidder or buying the item from the lowest bidder. Some exceptions to this definition exist and are described in the section about different types 745c45793f
