Nicotinic acid is also a prescription medication. Amounts far in excess of the recommended dietary intake for vitamin functions will lower blood triglycerides and low density lipoprotein cholesterol (LDL-C), and raise blood high density lipoprotein cholesterol (HDL-C, often referred to as "good" cholesterol). There are two forms: immediate-release and sustained-release nicotinic acid. Initial prescription amounts are 500 mg/day, increased over time until a therapeutic effect is achieved. Immediate-release doses can be as high as 3,000 mg/day; sustained-release as high as 2,000 mg/day. Despite the proven lipid changes... 1c93752078

Started in 1998 with the aim of providing a platform for the Indian student community to develop and showcase their projects, with a footfall of 1.8 lakhs in its latest edition. The activities culminate in a large three-day event on the campus of IIT Bombay which attracts people from all over the world, including students, academics, and other members of the

Nanomaterials exhibit different chemical and physical properties or biological effects compared to larger-scale counterparts that can be beneficial for drug delivery systems. Some important advantages of nanoparticles are their high surface-area-to-volume ratio, chemical and geometric tunability, and their ability to interact with biomolecules to facilitate uptake across the cell membrane. The large surface area... 1c93752078

Algae fuel These fuels have no practical significance but remain an aspirational target in the biofuels research area. Trivedi, Jayati; Aila, Mounika; Bangwal, D. ; Garg, M. Renewable and Algae fuel, algal biofuel, or algal oil is an alternative to liquid fossil fuels that use algae as the source of energy-rich oils. 026. Also, algae fuels are an alternative to commonly known biofuel sources, such as corn and sugarcane. doi:10. 11. rser. 1016/j. "Algae based biorefinery – How to make sense. ". (2015). Feedback 1 March 2012. 224–225. (2006). The system can then be said to feed back into itself. Garg Feedback occurs when outputs of a system are routed back as inputs as part of a chain of cause and effect that forms a circuit or loop. The notion of cause-and-effect has to be handled carefully when applied to feedback systems:. ISBN 978-81-224-1780-7. New Age International. Electronics (fundamentals And Applications). The Indus river rises in western China, flows northwest through the disputed Kashmir region, first through the Indian-administered Ladakh, and then the Pakistani-administered Gilgit-Baltistan, bends sharply to the left after the Nanga Parbat massif, and flows south-by-southwest through Pakistan, before bifurcating and emptying into the Arabian Sea, its main stem located near the port city of Karachi. Treaty gives India control over the waters of the three "Eastern Rivers"—the

Beas, Ravi and... 1c93752078 Simple causal reasoning about a feedback system is difficult because the first system influences the second and second system influences the first, leading to a circular argument. This makes reasoning based upon cause and effect tricky, and it is necessary to analyze the system as a whole. As provided by Webster, feedback in business is the transmission of evaluative or corrective information about an action, event, or process to the original or controlling source. 1c93752078

Biofuel Indian Institute Biofuel is a fuel that is produced over a short time span from biomass, rather than by the very slow natural processes involved in the formation of fossil fuels such as oil. Biofuel can be produced from plants or from agricultural, domestic or industrial bio waste. Retrieved 14 July 2010. July 2011. Biofuels (and bio energy in general) are regarded as a renewable energy source. Sukla MK, Bhaskar T, Jain AK, Singal SK, Garg MO. Biofuels are mostly used for transportation, but can also be used for heating and electricity. The use of biofuel has been subject to criticism regarding the "food vs fuel" debate, varied assessments of their sustainability, and ongoing deforestation and biodiversity loss as a result of biofuel production.
