Felix Klein His 1872 Erlangen program classified geometries by their basic symmetry groups and was an influential synthesis of much of the mathematics of the time. In 1905, he was instrumental in formulating a plan recommending that analytic geometry, the rudiments of differential and integral calculus, and the Felix Christian Klein (; German: [klaɪn]; 25 April 1849 – 22 June 1925) was a German mathematician, mathematics educator and historian of mathematics, known for his work in group theory, complex analysis, non-Euclidean geometry, and the associations between geometry and group theory a2f45e5fcf

John von Neumann Von Neumann had perhaps the widest coverage of any mathematician of his time, integrating pure and applied sciences and making major contributions to many fields, including mathematics, physics, economics, computing, and statistics. tool to brute force the solution to a problem numerically, but could also provide insight for solving problems analytically, and that there was an enormous John von Neumann (von NOY-mən; Hungarian: Neumann János Lajos ['nɔjmøn 'ja:nɔf 'lɔjoʃ]; December 28, 1903 – February 8, 1957) was a Hungarian and American mathematician, physicist, computer scientist and engineer. His analysis of the structure of self-replication preceded the discovery of the structure of DNA. He was a pioneer in building the mathematical framework of quantum physics, in the development of functional analysis, and in game theory, introducing or codifying concepts including cellular automata, the universal constructor and the digital computer a2f45e5fcf

Italians Recent analytic philosophers include Carlo Penco, Gloria Italians (Italian: italiani, pronounced [itaˈljaːni]) are a European ethnic group native to the Italian geographical region. Giuseppe Peano was one of the founders of analytic philosophy and contemporary philosophy of mathematics. Legally, Italian nationals are citizens of Italy, regardless of ancestry or nation of residence (in effect, however, Italian nationality is largely based on jus sanguinis) and may be distinguished from ethnic Italians in general or from people of Italian descent without Italian citizenship and ethnic Italians living in territories adjacent. Their predecessors differ regionally, but generally include populations such as the Etruscans, Rhaetians, Ligurians, Adriatic Veneti, Ancient Greeks and Italic peoples, including Latins, from which Romans emerged and helped create and evolve the modern Italian identity. Italians share a common culture, history, ancestry and language a2f45e5fcf

Centralized discussion a2f45e5fcf During his tenure at the University of Göttingen, Klein was able to turn it into a center for mathematical and scientific research through the establishment of new lectures, professorships, and institutes. His seminars covered most areas of mathematics then known as well as their applications.
