System information modelling Edwards, D. &quot;System information modelling in practice: Analysis of tender documentation quality in a mining mega-project&quot; (PDF). J. (2017). Components, connections and functions are defined and linked as they would be in the real world. System information models are digital representations of connected systems, such as electrical instrumentation and control, power, and communication systems. The objects modelled in a SIM have a 1:1 relationship with the objects in the physical system. Automation in System information modelling (SIM) is the process of modelling complex connected systems b92233dea8
