List of Japanese inventions and discoveries 66 ff. In particular, Japan has played a crucial role in the digital revolution since the 20th century, with many modern revolutionary and widespread technologies in fields such as electronics and robotics introduced by Japanese inventors and entrepreneurs. the Tokugawa Period, University of Washington Press, 1964, pp. Nakamichi, Masayuki (24 August 2021). "Professor Masao Kawai, a pioneer and leading This is a list of Japanese inventions and discoveries. Japanese pioneers have made contributions across a number of scientific, technological and art domains

CD player To listen to music using a CD player with a headphone output jack, the user plugs headphones or earphones into the headphone jack. CD players were first sold to consumers in 1982. CDs typically contain recordings of audio material such as music or audiobooks. Most CD players produce an output signal via a headphone jack or RCA jacks. To use a CD player in a home stereo system, the user connects an RCA cable from the RCA jacks to a hi-fi (or other amplifier) and loudspeakers for listening to music. CD players may be part of home stereo systems, car audio systems, personal computers, or portable CD players such as CD boomboxes. portal Compact Cassette High-end audio Jukebox List of compact disc player manufacturers MP3 CD Optical disc drive Radio cassette Radio receiver, includes A CD player is an electronic device that plays audio compact discs, which are a digital optical disc data storage format

Seiko is widely known for its wristwatches. Seiko and Rolex are the only two watch companies considered to be vertically integrated. Seiko is able to design and develop all the components of a watch, as well as assemble, adjust, inspect and ship them in-house. Seiko's mechanical watches consist of approximately 200 parts, and the company has the technology and production facilities to design and manufacture all of these parts internally.

Subwoofer Nakamichi. "RM Series". This very low-frequency (VLF) range reproduces the natural fundamental tones of the bass drum, electric bass, double bass, grand piano, contrabassoon, tuba, in addition to thunder, gunshots, explosions, etc. The typical frequency range that is covered by a subwoofer is about 20–200 Hz for consumer products, below 100 Hz for professional live sound, and

below 80 Hz in THX-certified systems. Polk Audio. Retrieved August 10, 2022. Retrieved August 10, 2022. Archived from the A subwoofer (or sub) is a loudspeaker designed to reproduce low-pitched audio frequencies, known as bass and sub-bass, that are lower in frequency than those which can be (optimally) generated by a woofer. "Experts Agree: You Need two subwoofers". Thus, one or more subwoofers are important for high-quality sound reproduction as they are responsible for the lowest two to three octaves of the ten octaves that are audible d1e7cd57ff

Hacker Radio Ltd Financial difficulties resulted in the company being sold and relaunched with the name Hacker Sound which closed in 1979. The company was formed in Maidenhead by brothers Ron and Arthur Hacker in 1959, and traded successfully until 1977. Hacker Hacker Radio Limited manufactured domestic radio and audio equipment. Dynatron Radio Ltd Dixon-Nutall, Geoffrey; Bussey, Gordon (1993). badge-engineered cassette decks from Japanese manufacturers including Sanyo and Nakamichi d1e7cd57ff

Records have been produced in different formats with playing times ranging from a few minutes to around 30 minutes per side. For about half a century, the discs were commonly made from shellac and these records typically ran at a rotational speed of 78 rpm, giving it the nickname "78s" ("seventy-eights"). After the 1940s, "vinyl" records made... d1e7cd57ff
