For example... a86f3735e9

Bionics Xin Tang and David Staack in an article published in Science Advances. Bionics refers to the flow of concepts from biology to engineering and vice versa Bionics or biologically inspired engineering is

the application of biological methods and systems found in nature to the study and design of engineering systems and modern technology

The word bionic, coined by Jack E. Steele in August 1958, is a portmanteau from biology and electronics which was popularized by the 1970s U.S. television series The Six Million Dollar Man and The Bionic Woman, both based on the novel Cyborg by Martin Caidin. All three stories feature humans given various superhuman powers by their electromechanical implants. a86f3735e9 All times shown are server time (UTC).
