

Mastering Emacs

Allegro Common Lisp Since its introduction, PerlTidy has become an oft-recommend tool for Perl programmers, noted in a number of key books. Notably, the work Perl Best Practices provides a set of PerlTidy configurations to match the syntax prescriptions in that book.

Armed Bear Common Lisp (ABCL)

Doom Emacs includes various tools and tweaks to simplify configuration. It features a dedicated helper utility that automates updates and personal setup.

CLISP

SLIME works with the following Common Lisp implementations:

JavaScript

Gnus blurs the distinction between news and e-mail, treating them both as "articles" that come from different sources. News articles are kept separate by group, and e-mail can be split into arbitrary groups, similar to folders in other mail readers. In addition, Gnus is able to use a number of web-based sources as inputs for its groups.

Clojure

Some implementations of other programming languages are using SLIME:

Users can customize Doom Emacs with over 150 modules, enabling tweaks and additional features. These modules range from basic language support to UI modifications, allowing users to tailor Doom Emacs to their personal computing environment.

Aside from the command line, there are a number of tools for alternate interfaces for PerlTidy, including one for the Padre IDE, perltidy.el for Emacs, and an online version.

Gnus other Emacs packages, such as the W3 web browser, LDAP lookup code, etc. It supports reading and composing both e-mail and news and can also act as an RSS reader, web processor, and directory browser for both local and remote filesystems. As part of Emacs, Gnus's features can be extended indefinitely through Emacs lisp Gnus (), or Gnus Network User Services, is a message reader which is part of GNU Emacs

Doom Emacs It is named after Doom, the classic game by id Software. It aims to balance stability, reproducibility, and efficiency while maintaining the flexibility

Doom Emacs is a configuration framework for GNU Emacs. Doom Emacs is a configuration framework for GNU Emacs. It aims to balance stability, reproducibility, and efficiency while maintaining the flexibility of a custom configuration

SLIME It is developed as an open-source public domain software project by Luke Gorrie and Helmut Eller. SLIME originates in an Emacs mode called SLIM written by Eric Marsden. Superior Lisp Interaction Mode for Emacs, is an Emacs mode for developing Common Lisp applications. SLIME uses a backend called Swank that is loaded into Common Lisp. Over 100 Lisp developers have contributed code to SLIME since the project was started in 2003. Steel Bank Common Lisp (SBCL)

The championships were held in three locations near the German/Czech/Polish border.

The program's tagline is "the extensible self-documenting text editor." Most functionality in GNU Emacs is implemented in user-accessible Emacs Lisp, allowing deep extensibility directly by users and through community-contributed packages. Its built-in features include a file browser and editor (Direx), an advanced calculator (Calc), an email client and news reader (Gnus), a Language Server Protocol integration, and the productivity system Org-mode. A large community of users have contributed...

Comparison of text editors GNU Emacs 27. This article may not be up-to-date or necessarily all-inclusive. Earlier versions of GNU Emacs can use a tabbed This article provides basic comparisons for notable text editors. Wayback Machine. 1 includes built-in support for tab bar (per-frame) and tab-line (per-window). More feature details for text editors are available from the Category of text editor features and from the individual products' articles
