Memory declarative memory resides semantic and episodic memory. Memory loss is usually described as forgetfulness or amnesia. If past events could not be remembered, it would be impossible for language, relationships, or personal identity to develop. Semantic memory refers to memory that is encoded with specific meaning. Meanwhile, episodic memory refers Memory is the faculty of the mind by which data or information is encoded, stored, and retrieved when needed. It is the retention of information over time for the purpose of influencing future action d244f51095
