History of ethanol fuel in Brazil months later with the Corsa 1. 8 Flexpower, using an engine developed by a joint-venture with Fiat called PowerTrain. Government policies and technological advances also allowed the country to achieve a landmark in ethanol consumption, when ethanol retail sales surpassed 50% market share of the gasoline-powered vehicle fleet in early 2008. Several important political and technological developments led Brazil to become the world leader in the sustainable use of bioethanol, and a policy model for other developing countries in the tropical zone of Latin America, the Caribbean, and Africa. That year production of full flex-fuel The history of ethanol fuel in Brazil dates from the 1970s and relates to Brazil's sugarcane-based ethanol fuel program, which allowed the country to become the world's second largest producer of ethanol, and the world's largest exporter. This level of ethanol fuel consumption had only been reached in Brazil once before, at 6825b6eb09

Tanks in World War II By war's end, a consensus was forming on tank doctrine and design. However, during World War II, most armies employed tanks, and thousands were built every month. Tank usage, doctrine, and production varied widely among the combatant nations. The tank was also employed in Tanks were an important weapons system in World War II. next tank in the series was the Fiat M14/41, a slightly improved version of the M13/40 with a more powerful diesel engine.
