Objections to evolution When Charles Darwin published his 1859 book *On the Origin of Species*, his theory of evolution (the idea that species arose through descent with modification from a single common ancestor in a process driven by natural selection) initially met opposition from scientists with different theories, but eventually came to receive near-universal acceptance in the scientific community. Michael Shermer Objections to evolution have been raised since evolutionary ideas came to prominence in the 19th century. The observation of evolutionary processes occurring (as well as the modern evolutionary synthesis explaining that evidence) has been uncontroversial among mainstream biologists since the 1940s.
