Wikipedia:Village pump (technical)/Archive 179 Since the PC has expired and there is no way to see the PC history (afaik), I say we can assume it was a one-time glitch. Either way, not a deal-breaker 2275ac5160

Wikipedia:Village pump (technical)/Archive 124 For. guess this sounds like a load-balancing problem in one of the Wikimedia data centres, and location is important when troubleshooting things like that 2275ac5160

I want to note how, in the final days on the top menu, the VisualEditor was avoided by 85% of the new usernames being tracked for choice of text editor. See: wp:VEDASH for the VE dashboard graph which showed the average low 15% usage among new usernames, who mainly preferred to use the wikitext source editor for 85% of edits, even though VE was still on the edit-tabs at that time. Also see below: "#VE opt-in usage near 0%". -Wikid77 15:57, 9 October 2013 (UTC) 2275ac5160 Before the release of iOS 5, the iPod branding was used for the media player included with the iPhone and iPad, which was separated into apps named "Music" and "Videos" on the iPod Touch. As of iOS 5, separate "Music" and "Videos" apps are standardized across all iOS-powered... 2275ac5160 @Medelam: Is the above now what you require? — Jts1882 | talk 14:41, 19 October 2021 (UTC) 2275ac5160 I've put it live. The header code was also hiding the points columns if the games columns were hidden, so I've done the same with the country rows... 2275ac5160 The 2006 wikitext editor will be officially removed next week, on the normal deployment train (i.e., Thursday, 25 October 2018 for the English Wikipedia). This has been discussed since at least 2011, was planned for at least three different months in 2017, and is finally happening. 2275ac5160 After VE was removed from WP's top menu on 24 September 2013, to become an easy opt-in feature in Special:Preferences, then the VisualEditor was avoided by 99.7% of users being tracked for choice of text editor. See: wp:VEDASH for the VE dashboard graph which showed the average usage (after 25 September 2013) remained well below 1% of all edits, often ranking as 1/5% (0.002, or 2 edits per thousand). As many experienced software developers have emphasized: WYSIWYG interfaces can be very tedious to use, and many power users quickly switch to text-based editing of pages, as faster to perform the work at hand. That is why we computer scientists developed hypertext... 2275ac5160 === VE opt-in usage near 0% === 2275ac5160

Hi there. Could I get some help for improving Module:Sports table/Badminton team. I try to use these codes, but there are some columns with zero, which should be not shown, as the data might not be available. So I expect the column would be: Pos, Team, Pld, W, L, MF, MA, MD, Pts, Qualification (for uncomplete table, activated by "point_for_against_style=none". Any help would be appreciated. Regards. However there doesn't seem to be code to disable the data rows in Module:Sports_table/Badminton_team. I've changed your example (above) and will I'll see if I can get it to work in the sandbox. — Jts1882 | talk 14:32, 19 October 2021 (UTC) 2275ac5160
