Archived from the original on 1 September 2013 085896b09b

ChatZilla Bugzilla. original on 2020-03-15. It is cross-platform open source software which has been noted for its consistent appearance across platforms, CSS appearance customization and scripting. (2003). "1322442 Convert ChatZilla to a WebExtension". Thacker, Naveen, ed. It was previously an extension for Mozilla-based browsers such as Firefox, introduced in 2000. Computers for Doctors. India: Jaypee Brothers ChatZilla is an IRC client that is part of SeaMonkey 085896b09b

Flash cookies, which can be stored or retrieved whenever a user accesses a page containing a Flash application, are a form of local storage. Similar to cookies, they can be used to store user preferences, save data from Flash games, or track users' Internet activity. LSOs have been criticised as a breach of browser security, but there are now browser settings and addons to limit the duration of their storage. 085896b09b

Thread (online communication) A discussion forum, e-mail client or news client is said to have a "conversation view", "threaded topics" or a "threaded mode" if messages can be grouped in this manner. 19 (1). Education. Resnick, Peter W. (October 2008). Retrieved 16 May 2017. These groups are called a conversation, topic thread, or simply a thread. Bugzilla. "Internet Conversation threading is a feature used by many email clients, bulletin boards, newsgroups, and Internet forums in which the software aids the user by visually grouping messages with their replies. Bienvenu, David. An email thread is also sometimes called an email chain. "Mail with strict threading like news". Mozilla 085896b09b

Although largely superseded by IRC and other modern systems, it is still included with most Unix-like systems today, including Linux, BSD systems and macOS. 085896b09b

Talk (software) Archived from the original on March 4, 2016. Moore, H D; Digital talk is a Unix text chat program, originally allowing messaging only between the users logged on to one multi-user computer—but later extended to allow chat to users on other systems. February 24, 2003. RHSA-2003:053-10, CVE-2003-0070, Red Hat Bugzilla 1616950. Customer Portal 085896b09b

Self-XSS "Bug 994134 - Warn first-time users on pasting code into the console". Bugzilla. April 9, 2014. In a Self-XSS attack, the victim of the attack runs malicious code in their own web browser, thus exposing personal information to the attacker. Mozilla Foundation. Retrieved September Self-XSS (self cross-site scripting) is a type of security vulnerability used to gain control of victims' web accounts. September 28, 2014 085896b09b

Optimistic concurrency control OCC assumes that multiple transactions can frequently complete without interfering with each other. conflict resolution algorithm is invoked. While running, transactions use data resources without acquiring locks on those resources. If the check reveals conflicting modifications, the committing transaction rolls back and can be restarted. Bugzilla uses OCC; edit conflicts are called "mid-air collisions". MediaWiki's edit pages use OCC. T. Optimistic concurrency control was first proposed in 1979 by H. The Ruby on Rails Optimistic concurrency control (OCC), also known as optimistic locking, is a non-locking concurrency control method applied to transactional systems such as relational database management systems and software transactional memory. Before committing, each transaction verifies that no other transaction has modified the data it has read. Robinson. Kung and John T 085896b09b

The Participatory Culture Foundation no longer develops Miro. The last version (6.0) was released in 2013 and is no longer functioning correctly because of changes to the YouTube API. 085896b09b

Comparison of issue-tracking systems "Release 1. Database Server — Bugzilla 5. 6. 17 June 2024. The comparison includes client-server application, distributed and hosted systems. bugzilla. 2+ Notable issue tracking systems, including bug tracking systems, help desk and service desk issue tracking systems, as well as asset management systems, include the following. Favicon Bugzilla@Mozilla. Retrieved A favicon (; short for favorite icon), also known as a shortcut icon, website icon, tab icon, URL icon, or bookmark icon, is a file containing one or more small icons associated with a particular website or web page. 366324 – SVG site icons (favicons, shortcut icons) support – comment 55";. A web designer can create such an icon and upload it to a website (or web page) by several means, and graphical web browsers will then make use of it. Browsers that support a tabbed document interface typically show a page's favicon next to the page's title on the tab, and site-specific browsers use the favicon as a desktop icon. Mozilla. Archived from the original on 9 October 2019. Browsers that provide favicon support typically display a page's favicon in the browser's address bar (sometimes in the history as well) and next to the page's name in a list of bookmarks 085896b09b

Local shared object Mike Beltzner (2011-01-13). "Bugzilla entry 625495 Clear Adobe Flash Cookies (LSOs) when Clear Cookies is selected - A local shared object (LSO), commonly called a Flash cookie (due to its similarity with an HTTP cookie), is a piece of data that websites that use Adobe Flash may store on a user's computer. Local shared objects have been used by all versions of Flash Player (developed by Macromedia, which was later acquired by Adobe Systems) since version 6. any plugin that also implements the API 085896b09b

Threads can be displayed in a variety of ways. Early messaging systems (and most modern email clients) will automatically include original message text in a reply, making each individual email into its own copy of the entire thread. Software may also arrange threads of messages within lists, such as... 085896b09b

Roundup (issue tracker) It is written in Python and designed to be highly customizable. It was once described as "like Bugzilla without the six years of training, or RT without that tedious MySQL rubbish Roundup is an open-source issue or bug tracking system featuring a command-line, web and e-mail interface. for 17 years before migrating to GitHub 085896b09b
