Hong Kong Diploma of Secondary Education familiarise with the exam requirement by doing DSE Past Paper, which can be found here. Since the implementation of the New Senior Secondary academic structure in 2012, HKDSEE replaced the Hong Kong Certificate of Education Examination (O Level, equivalent of GCSE) and Hong Kong Advanced Level Examination (A Level). For each level, there is a DSE cut off score. The HKDSE examination is Hong Kong's university entrance examination, administered at the completion of the three-year New Senior Secondary (NSS) education, allowing students to gain admissions to undergraduate courses at local universities through JUPAS. Thus, tertiary institutions The Hong Kong Diploma of Secondary Education Examination (HKDSEE) is an examination organised by the Hong Kong Examinations and Assessment Authority (HKEAA) 8b67934739

Signal-flow graph used in Design Space Exploration (DSE), as an intermediate representation towards a physical implementation. Thus, signal-flow graph theory builds on that of directed graphs (also called digraphs), which includes as well that of oriented graphs. This mathematical theory of digraphs exists, of course, quite apart from its applications. The DSE process seeks a suitable solution A signal-flow graph or signal-flowgraph (SFG), invented by Claude Shannon, but often called a Mason graph after Samuel Jefferson Mason who coined the term, is a specialized flow graph, a directed graph in which nodes represent system variables, and branches (edges, arcs, or arrows) represent functional connections between pairs of nodes 8b67934739
