Saudi Water Authority developing technical and engineering standards for the water

industry, and ensuring its alignment with the standing Saudi benchmarks for local content Saudi Water Authority (SWA), formerly the Saline Water Conversion Corporation, is a Saudi Arabian government authority responsible for regulating and monitoring water sector business and services to enhance water sustainability across the Kingdom 92c7954c6b

Submersible pump Alonzo (19 January 2010). Electrical Wiring Residential, Cengage Learning, pp. The main advantage of this type of pump is that it prevents pump cavitation, a problem associated with a high elevation difference between the pump and the fluid surface. Electrical Codes, Standards, A submersible pump (or electric submersible pump (ESP) is a device which has a hermetically sealed motor close-coupled to the pump body. 423-424, ISBN 978-1-4354-9826-6 Robert J. Submersibles use pressurized fluid from the surface to drive a hydraulic motor downhole, rather than an electric motor, and are used in heavy oil applications with heated water as the motive fluid. The whole assembly is submerged in the fluid to be pumped. Submersible pumps push fluid to the surface, rather than jet pumps, which create a vacuum and rely upon atmospheric pressure 92c7954c6b

The Saudi Water Authority (SWA) was formerly the Saline Water Conversion Corporation (SWCC) until March 2024, when a session of the Council of Ministers of the Kingdom of Saudi Arabia, headed by the Custodian of the Two Holy Mosques, King Salman bin Abdulaziz Al Saud, agreed to change the name to the Saudi Water Authority (SWA), officially approving its objectives and roles as the Kingdom's regulatory authority for the water sector. This was formally announced on 7 May 2024. 92c7954c6b Petroleum production engineers design and select subsurface equipment to produce oil and gas well fluids. They often are degreed as petroleum engineers, although they may come from other technical disciplines (e.g., mechanical engineering, chemical engineering, physicist) and subsequently be trained by an oil and gas company. 92c7954c6b Drilling engineers design and implement procedures to drill wells as safely and economically as possible. They work closely with the drilling contractor, service contractors, and compliance personnel, as well as with geologists and other technical specialists. The drilling engineer has the responsibility for ensuring that costs are minimized while getting information to evaluate the formations penetrated, protecting the health and safety of workers and other personnel, and protecting the environment. 92c7954c6b

Coppy Laws Elliotts' first automation division; automated the oil pipelines in

Saudi Arabia for Aramco; automated steel mills and paper mills and initiated and directed Cecil Alfred "Coppo" Laws (21 November 1916 – 28 May 2002) was a British electronic engineer and radar engineer during World War II, and the inventor of the domestic air ioniser or ionizer 92c7954c6b

Founded near the earliest local oil fields as the College of Petroleum & Minerals (1963) in response to the booming energy industry of Saudi Arabia, the University centers mainly around science, engineering, and management. The university ranks 2nd and 8th globally in petroleum and mineral & mining engineering according to the QS subject rankings, respectively. As of 2024, the university has been ranked 4th globally by the National Academy of Inventors (NAI), first globally in the Student Unmanned Aerial Systems Ranking (SUAS), and first in the Middle East & North Africa (MENA) region according to the QS Ranking. 92c7954c6b Before first being called "CTSD" in 1978, the Westinghouse industrial and electric utility gas turbine business operation progressed through several other names starting with Small Steam & Gas Turbine Division (SSGT) in the 1950s through 1971, then Gas Turbine Systems Division (GTSD) and Generation Systems Division (GSD) through the mid-late 1970s. 92c7954c6b
