Energy transition Review of World Energy Archived 17 October 2020 at the Wayback Machine,
Workbook (xlsx), London, 2016 World Energy Assessment Archived 12 November 2020 An energy
transition (or energy system transformation) is a major structural change to energy supply and
consumption in an energy system. Currently, a transition to sustainable energy is underway to
limit climate change. The current transition aims to reduce greenhouse gas emissions from energy
quickly and sustainably, mostly by phasing-down fossil fuels and changing as many processes as
possible to operate on low carbon electricity. Therefore, another term for energy transition is
renewable energy transition. Most of the sustainable energy is renewable energy. A previous
energy transition perhaps took place during the Industrial Revolution from 1760 onwards, from
wood and other biomass to coal, followed by oil and later natural gas ab8b697963

Chinese literature ISBN 0-231-15658-8 Idema Wilt L. How to Read Chinese Poetry Workbook. The
introduction of widespread woodblock printing during the Tang and the invention of movable type
printing by Bi Sheng (990–1051) during the Song rapidly spread written knowledge throughout.
ISBN 0-253-20284-1 Cui, Jie and Zong-qi Cai (2012). During the Ming and Qing, mature novels were
written in written vernacular Chinese, an evolution from the preeminence of Literary Chinese
patterned off the language of the Chinese classics. New York: Columbia University Press. The
history of Chinese literature extends thousands of years, and begins with the earliest recorded
inscriptions, court archives, building to the major works of philosophy and history written during
the Axial Age. The Han (202 BC – 220 AD) and Tang (618–907 AD) dynasties were considered
golden ages of poetry, while the Song (960–1279) and Yuan (1271–1368) were notable for their
lyrics (ci), essays, dramas, and plays ab8b697963
