

Google Manual Search

Until 20 May 2015, the service was called Google Webmaster Tools. In January 2018, Google introduced a new version of the search console, with changes to the user interface. In September 2019, old Search Console reports, including the home and dashboard pages, were removed.

Google Blog Search Google to access and search the Blogsearch database by manually formatting the URL in your browser's address bar. But in March 2016, Google also took away this Google Blog Search was a specialized service of Google used to search blogs. The Blog Search was "the first major search engine to offer full-blown blog and feed search capabilities". It was released in 2005. The Blog Search searches were done identically to the Google Search by typing your search terms in the search field and seeing the most relevant results related to the topic. The Blog Search looked at various services in the world of blogs like Blogger, LiveJournal, and Weblog. It was discontinued in May 2011. The bots appeared to be faster than the standard Googlebot, because updates to blogs often become available within hours instead of weeks taken by Googlebot default. For some time it was possible to force Google to access and search the Blogsearch database by manually formatting

In September 2011, Google announced it would discontinue a number of its products, including Google Desktop. The reason given was that "In the last few years, there's been a huge shift from local to cloud-based storage and computing, as well as the integration of search and gadget functionality into most modern operating systems. People now have instant access to their data, whether online or offline. As this was the goal of Google Desktop, the product will be... The Google Optimize website was used to design experiments and open a WYSIWYG editor for each version tested in the experiment. The free version allowed running a few experiments at the same time, and a user needed to upgrade to Google Optimize 360 to run more of them. There were also other constraints, including limited audience targeting options.

Google Desktop Google Desktop was a computer program with desktop search capabilities, created by Google for Linux, Apple Mac OS X, and Microsoft Windows systems. It allowed text searches of a user's email messages, computer files, music, photos, chats, web pages viewed, and the ability to display "Google Gadgets" on the user's desktop in a sidebar. It Google Desktop was a computer program with desktop search capabilities, created by Google for Linux, Apple Mac OS X, and Microsoft Windows systems

While unofficial and not maintained by Google itself, elgooG is a website that contains all Google Easter eggs, whether or not Google has discontinued them. Google Search is the most-visited website in the world. As of 2025, Google Search has a 90% share of the global search engine market. Approximately 24.84% of Google's monthly global traffic comes from the United States, 5.51% from India, 4.7% from Brazil, 3.78% from the United Kingdom and 5.28% from Japan according to data provided by Similarweb. The order of search results returned by Google is based, in part, on a priority rank system called "PageRank". Google... The Google Optimize editor was a Chrome extension that allowed changing some aspects of visible HTML elements. Changes were then applied with JavaScript tailored by rules set in an... In expurgated texts, substitutions such as "read the frickn' manual...

Google Search Console Google Search Console (formerly Google Webmaster Tools) is a web service by Google which allows webmasters to check indexing status, search queries, crawling Google Search Console (formerly Google Webmaster Tools) is a web service by Google which allows webmasters to check indexing status, search queries, crawling errors and optimize visibility of their websites

Usage is variously viewed as a pointed reminder of etiquette to try to find a solution before posting to a mass forum or email alias; helping a newer user (colloquially and demeaningly referred to as a noob within internet culture) to improve themselves; as a useless response; or as a hostile and elitist response. Polite usages would mention where one has looked when asking a question, and to provide an exact location or link where exactly to RTFM.

Google Programmable Search Engine Google Programmable Search Engine (formerly known as Google Custom Search and Google Co-op) is a platform provided by Google that allows web developers Google Programmable Search Engine (formerly known as Google Custom Search and Google Co-op) is a platform provided by Google that allows web developers to feature specialized information in web searches, refine and categorize queries and create customized search engines, based on Google Search. Google launched the service on October 23, 2006

Search engine accessible to crawlers. There have been many search engines since the dawn of the Web in the 1990s, however, Google Search became the dominant one in the 2000s A search engine is a software system that provides hyperlinks to web pages, and other relevant information on the Web in response to a user's query. Users also have the option of limiting a search to specific types of results, such as images, videos, or news. The user enters a query in a web browser or a mobile app, and the search results are typically presented as a list of hyperlinks accompanied by textual summaries and images

Timeline of Google Search Google Search, offered by Google, is the most widely used search engine on the World Wide Web as of 2023, with over eight billion searches a day. This page covers key events in the history of Google's search service. This Google Search, offered by Google, is the most widely used search engine on the World Wide Web as of 2023, with over eight billion searches a day

For a search provider, its engine is part of a distributed computing system that can encompass many data centers throughout the world. The speed and accuracy of an engine's response to a query are based on a complex system of indexing that is continuously updated by automated web crawlers. This can include data mining the files and databases stored on web
