Information security indicators Guidelines for building and operating a secured SOC (ISI-007):
A set of requirements to build and operate a secured SOC (Security Operations Center)
addressing In information technology, benchmarking of computer security requires
measurements for comparing both different IT systems and single IT systems in dedicated
situations. The technical approach is a pre-defined catalog of security events (security
incident and vulnerability) together with corresponding formula for the calculation of security
indicators that are accepted and comprehensive 979beee043
