Dive computer USA. May 1989. Dacor Corporation. Dacor Micro-brain Pro Plus Dive Computer Manual (PDF). American Academy of Underwater Sciences. Archived (PDF) from the A dive computer, personal decompression computer or decompression meter is a device used by an underwater diver to measure the elapsed time and depth during a dive and use this data to calculate and display an ascent profile which, according to the programmed decompression algorithm, will give a low risk of decompression sickness. A secondary function is to record the dive profile, warn the diver when certain events occur, and provide useful information about the environment. Dive computers are a development from decompression tables, the diver's watch and depth gauge, with greater accuracy and the ability to monitor dive profile data in real time 9941534bec
