Niger Delta mangroves Considered one of the most ecologically sensitive regions in the world, the Niger Delta mangrove forest is situated within a deltaic depositional environment. Similarly, the Mangrove Action Nigeria has extensive mangrove forests in the coastal region of the Niger Delta. These mangrove forests serve a critical role in regional ecological and landscape composition, and support subsistence gathering practices, and market-based income opportunities. Anthropogenic development threatens the survival of Niger Delta mangrove populations. mangrove areas in Bodo Creek.
