

C S French Data Processing And Information Technology

Over 80 countries and independent territories, including nearly every country in Europe and many in Latin America and the Caribbean, Asia, and Africa, have now adopted comprehensive data protection laws. The European Union has the General Data Protection Regulation (GDPR), in force since May 25, 2018. The United States is notable for not having adopted a comprehensive information privacy law... 010ca557c2

International Federation for Information Processing The International Federation for Information Processing (IFIP) is a global organisation for researchers and professionals working in the field of computing The International Federation for Information Processing (IFIP) is a global organisation for researchers and professionals working in the field of computing to conduct research, develop standards and promote information sharing 010ca557c2

Geographic information system In a broader sense, one may consider such a system also to include human users and support staff, procedures and workflows, the body of knowledge of relevant concepts and methods, and institutional organizations. Geoprocessing allows for definition, management, and analysis of A geographic information system (GIS) consists of integrated computer hardware and software that store, manage, analyze, edit, output, and visualize geographic data. selection and analysis, topology processing, raster processing, and data conversion. Much of this often happens within a spatial database; however, this is not essential to meet the definition of a GIS 010ca557c2

The abbreviation PII is widely used in the United States, but the phrase it abbreviates has four common variants based on personal or personally, and identifiable or identifying. Not all are equivalent, and for legal purposes the effective

definitions vary depending on the jurisdiction and the purposes for which the term is being used. Under European Union and United Kingdom data protection regimes, which centre primarily on the General Data Protection Regulation (GDPR), the term "personal data" is significantly broader, and determines the scope of the regulatory regime. 010ca557c2 ICT is also used to refer to the convergence of audiovisuals and telephone networks with computer networks through a single cabling or link system. There are large economic incentives to merge the telephone networks with the computer network system using a single unified system of cabling, signal distribution, and management. ICT is an umbrella term that includes any communication device... 010ca557c2

Personal data Personal data, also known as personal information or personally identifiable information (PII), is any information related to an identifiable person. Personal data, also known as personal information or personally identifiable information (PII), is any information related to an identifiable person 010ca557c2

The uncouneted plural, geographic information systems, also abbreviated GIS, is the most common term for the industry and profession concerned with these systems. The academic discipline that studies these systems and their underlying geographic principles, may also be abbreviated as GIS, but the unambiguous... 010ca557c2

Information privacy law This includes usually the right to get details on which data is stored, for what purpose and to request the deletion in case the purpose is not given anymore. The various Information privacy, data privacy or data protection laws provide a legal framework on how to obtain, use and store data of natural persons. The various laws around the world describe the rights of natural persons to control who is using their data. Information privacy, data privacy or data protection laws provide a legal framework on how to obtain, use and store data of natural persons 010ca557c2

Information and communications technology Information and communications technology (ICT) is an extensional term for information technology (IT) that stresses the role of unified communications Information and communications technology (ICT) is an extensional term for information technology (IT) that stresses the role of unified communications

and the integration of telecommunications (telephone lines and wireless signals) and computers, as well as necessary enterprise software, middleware, storage and audiovisual, that enable users to access, store, transmit, understand and manipulate information 010ca557c2
