e8b1d56939 Friction can have dramatic consequences, as illustrated by the use of friction created by rubbing pieces of wood together to start a fire. Another important consequence of many types of friction can be wear, which may lead to performance degradation or damage to components. It is known that frictional energy losses account for about 20% of the total energy expenditure of the world. e8b1d56939 As briefly discussed later, there are many different contributors to the retarding force in... e8b1d56939
