Determinism Deterministic theories throughout the history of philosophy have developed from diverse and sometimes overlapping motives and considerations. These Determinism is the metaphysical view that all events within the universe (or multiverse) can occur only in one possible way. Determinism is often contrasted with free will, although some philosophers argue that the two are compatible. The antonym of determinism is indeterminism, the view that events are not deterministically caused. everything including the brain/mind is subject to the laws of causality) is compatible with minds capable of science, fatalism and predestination is not. Like eternalism, determinism focuses on particular events rather than the future as a concept a5366c2858
