Hilbert's problems They were all unsolved at the time, and several proved to be very influential for 20th-century mathematics. Hilbert presented ten of the problems (1, 2, 6, 7, 8, 13, 16, 19, 21, and 22) at the Paris conference of the International Congress of Mathematicians, speaking on August 8 at the Sorbonne. Hilbert's problems are 23 problems in mathematics published by German mathematician David Hilbert in 1900. Earlier publications (in the original German) appeared in *Archiv der Mathematik und Physik*. They were all unsolved at the time, and several Hilbert's problems are 23 problems in mathematics published by German mathematician David Hilbert in 1900. The complete list of 23 problems was published later, in English translation in 1902 by Mary Frances Winston Newson in the *Bulletin of the American Mathematical Society*

List of unsolved problems in mathematics Some problems belong to more than one discipline and are studied using techniques from different areas. These problems come from many areas of mathematics, such as theoretical physics, computer science, algebra, analysis, combinatorics, algebraic, differential, discrete and Euclidean geometries, graph theory, group theory, model theory, number theory, set theory, Ramsey theory, dynamical systems, and partial differential equations. Prizes are often awarded for the solution to a long-standing problem, and some lists of unsolved problems, such as the Millennium Prize Problems, receive considerable attention.
