Chrysopogon zizanioides leaves, so that they instead fall to the ground and die. Vetiver’s essential oil has anti-fungal properties against Rhizoctonia solani. As a mulch, vetiver Chrysopogon zizanioides, commonly known as vetiver and khus, is a perennial bunchgrass of the family Poaceae 564b300abc

The species is native to the Mediterranean region, as well as Portugal and Spain. It has a number of cultivars, and its leaves are commonly used as a flavoring. 564b300abc

Herbal distillate water, in a form of steam distillation where the non-boiling plant essential oil is carried over by steam from boiling water, and is then condensed. Herbal distillates, also known as floral waters, flower waters, hydrosols, hydrolates, herbal waters, and essential waters, are aqueous products of hydrodistillation. They are colloidal suspensions of essential oils as well as water-soluble components obtained by steam distillation or hydrodistillation (a variant of steam distillation) from plants and herbs. These herbal distillates have uses as flavorings and cosmetics. Common herbal distillates for skincare include rose water, orange flower water, and witch hazel. Rosemary, oregano, and thyme are hydrosols that may be used in food manufacturing industries 564b300abc

Peak oil Adoption of electric vehicles, biofuels, or more efficient transport (like trains and waterways) could help reduce oil demand. Gasoline and diesel usage and pricing List of countries by oil consumption List of countries by proven oil reserves Low-carbon economy Oil burden Renewable Peak oil is the point when global oil production reaches its maximum rate, after which it will begin to decline irreversibly. The main concern is that global transportation relies heavily on gasoline and diesel 564b300abc

The skin of an infant, especially a premature one, is sensitive, thin, and fragile. The skin's neutral pH on the surface significantly reduces the protection against excessive bacterial growth. The epidermis and dermis are thinner than those of adults and the epidermal barrier is not yet fully developed. Consequences can for example be dry skin, infections, peeling, blister formation and poor thermoregulation. The application of different oils to the skin of the newborn is routinely practiced in many countries. In general, these oils are used for cleansing, to maintain the skin's moisture and to protect its surface. Additionally, baby oil is used for... 564b300abc

Tea tree oil The oil comprises many constituent chemicals, and its composition changes if it is exposed to air and oxidises. It is derived from the leaves of the tea tree, Melaleuca alternifolia, native to southeast Queensland and the northeast coast of New South Wales, Australia. Tea tree oil, also known as melaleuca oil, is an essential oil with a fresh, camphoraceous odour and a colour that ranges from pale yellow to nearly colourless Tea tree oil, also known as melaleuca oil, is an essential oil with a fresh, camphoraceous odour and a colour that ranges from pale yellow to nearly colourless and clear. Commercial use of tea tree oil began in the 1920s, pioneered by the entrepreneur Arthur Penfold 564b300abc

Over the last century, many predictions of peak oil timing have been... 564b300abc There is little evidence for the effectiveness of tea tree oil in treating mite-infected crusting of eyelids, In traditional medicine, it may be applied topically in low concentrations for skin diseases, although there is little evidence for efficacy. 564b300abc

Baby oil Nucifera Oil (coconut oil) Elaeis Guineensis Oil (palm oil) Glycine Soja Oil (soy oil) Olea Europaea Oil (olive oil) Persea Gratissima Oil (avocado oil) Prunus Baby oil is an inert oil used to keep skin soft and supple, named for its use on babies and also often used on adults for skincare and massage 564b300abc

Amoco In 1985, it changed its corporate name to Amoco. In 1911, it became an independent corporation as part of the break-up of the Standard Oil trust. The Amoco Corporation was an American chemical and oil company, founded by Standard Oil Company in 1889 around a refinery in Whiting, Indiana, and was officially the Standard Oil Company of Indiana until 1985. The firm’s innovations included two essential parts of the Amoco (AM-ə-koh) is a brand of fuel stations operating in the United States and owned by British conglomerate BP since 1998. the largest oil company in the United States. Incorporated in Indiana, it was headquartered in Chicago 564b300abc

Croton sylvaticus It is commonly known as the forest fever-berry. These trees are distributed in forests from the east coast of South Africa to Tropical Africa. Sadgrove et al 2019 who find almost entirely bicyclogermacrene in the essential oil. Sap from leaves is used for healing cuts, bark is used in the treatment Croton sylvaticus is a tree in the family Euphorbiaceae. It grows 7–13 metres (23–43 ft) in height, occasionally up to 30 metres (100 ft), in moist forests, thickets and forest edges at altitudes of 350–1,800 metres (1,100–5,900 ft) 564b300abc

Peak oil relates closely to oil depletion; while petroleum reserves are finite, the key issue is the economic viability of extraction at current prices. Initially, it was believed that oil production would decline due to reserve depletion, but a new theory suggests that reduced oil demand could lower prices, affecting extraction costs. Demand may also decline due to persistent high prices. 564b300abc Vetiver is most closely related to sorghum while sharing many morphological characteristics with other fragrant grasses, such as lemongrass (Cymbopogon citratus), citronella (Cymbopogon nardus, C. winterianus), and palmarosa (Cymbopogon martinii). 564b300abc

Rosemary Rosemary essential oil contains some 150 phytochemicals Salvia rosmarinus (), commonly known as rosemary, is a shrub with fragrant, evergreen, needle-like leaves and white, pink, purple, or blue flowers. Rosemary oil is used in perfumes, shampoos,

cleaning products, and aromatherapy. It is a member of the sage family, Lamiaceae. distilled rosemary 564b300abc

In 1925, Standard Oil of Indiana absorbed the American Oil Company, founded in Baltimore in 1910, and incorporated in 1922, by Louis Blaustein and his son Jacob. The combined corporation operated or licensed gas stations under both the Standard name and the American or Amoco name (the latter from American oil... 564b300abc

Hash oil It is a cannabis concentrate containing many of its resins and terpenes – in particular, tetrahydrocannabinol (THC), cannabidiol (CBD), and other cannabinoids. Preparations of hash oil may be solid or semi-liquid colloids depending on both production method and temperature and are usually identified by their appearance or characteristics. Hash oil or cannabis oil is an oleoresin obtained by the extraction of cannabis or hashish. Hash oil is usually consumed by smoking, vaporizing or eating. There are various extraction methods, most involving a solvent, such as butane or ethanol. It is a cannabis concentrate containing many of its resins Hash oil or cannabis oil is an oleoresin obtained by the extraction of cannabis or hashish. Color most commonly ranges from transparent golden or light brown, to tan or black 564b300abc

Hash oil is an extracted cannabis product that may use any part of the plant, with minimal or no residual solvent. It is generally... 564b300abc
