The disk drive uses group coded recording (GCR) and contains a MOS Technology 6502 microprocessor, doubling as a disk controller and on-board disk operating system processor. The number of sectors per track varies from 17 to 21 (an early implementation of zone bit recording with 4 constant angular velocity zones). The drive's built-in disk operating system is CBM DOS 2.6. The format was developed by Tekla and Solibri and later adopted as a standard by buildingSMART. Most major BIM modelling software platforms support some integration with BCF, typically through plug-ins provided by the BCF server vendor.
